## Articulator

(hinged; for complete dentures)

Ref. 010010

Hinged articulator with stainless steel adjustment axle and adjustment screw. Made of high quality brass. Adjustable by means of a screw.

## Articulator (cone articulator)

Ref. 010020

This articulator is adjusted by means of cones: one fixed and the other moveable. This prevents disadjustments due to wear.

## Articulator (functional movement articulator)

Ref. 010030

Ref. 010032 (with trays)

It is made in light alloy and combines perfectly weight and endurance. It accurately reproduces jaw movement thanks to its central spring and the lean of the supports

## Functional articulator

Ref. 010040 (two-point) Ref. 010050 (three-point)

## Functional articulator

Ref. 010060 (two-point; for bridges)

Made of brass and stainless steel. Thanks to the spring fitted at the centre of the maxilla, this can be moved and then returned to its original position

## Articulator for balanced prosthesis

Ref. 010070

Equipped with removable plastic bases, it allows to operate with several models at the same time.

## Balanced articulator

(light) Ref. 010090

The MESTRA articulator reproduces jaw movements based on average records obtained from clinical diagnoses

## Balanced articulator

(light) Ref. 010090 B

Same characteristics of Ref.010090, without the occlusal plane.

## Spring articulator

Ref. 010150

## Plastic articulator (disposable)

(100 articulators)

Ref. 010147

Ref. 010148

## Plastic articulator (disposable)

Ref. 010140 Complete kit. Presentation:  
4 bases for complete prosthesis  
2 bases for partial prosthesis  
1 x 20 g container of cyanoacrylate  
50 articulators

(L) 250 x (W) 150 x (H) 100 mm 1,039 kg

## Spare parts (100 articulators)

Ref. 010145

## Condylar articulator

(magnetic) Ref. 010185

(pins) Ref. 010186

## Quick fixing articulator

(for complete prosthesis) Ref. 010160 (for partial prosthesis) Ref. 010172

## Arcon type articulator Arquimedes professional

(semiaadjustable) A7 PLUS

Ref. 010099

Articulator + Case

Robust structure made of aluminum, ensuring greater stability. Design that provides greater visibility.

- Semiaadjustable / Arcon.
- Fixed intercondylar distance (110 mm).
- Curve condylar guide.
- Regulable condylar guide.
- Regulable Bennet angle.
- Central lock.
- Stabilization system of the condilar guide movement with silicone connection.
- Support for upper branch in open position.

## Arcon type articulator Arquimedes protrusal

(semiaadjustable) A7 PLUS-E

Ref. 010103

Articulator + Case

Similar to the Archimedes Pro model, it has exclusive aluminum condylar guides with millimeter adjustment.

- Semiaadjustable / Arcon.
- Fixed intercondylar distance (110 mm).
- Regulable condylar guide.
- Regulable Bennet angle.
- Flat condylar guide.
- Bilateral locking system.
- Support for upper branch in open position.
- Stabilization system of the condilar guide movement with spring.

## Arcon type articulator 4.000 S

(semiaadjustable)

Ref. 010107

Articulator + Case

- Semiaadjustable / Arcon.
- Adjustable intercondylar distance (expanding spindle).
- Curve condylar guide.
- Regulable condylar guide.
- Regulable Bennet angle.
- Stabilization system of the condilar guide movement with O-ring.

## Arquimedes Junior

(semiaadjustable) A7 FIX

Ref. 010098

Articulator + Carboard box

- Semiaadjustable / Arcon.
- Fixed intercondylar distance (110 mm).
- Condylar guide set at average 30°.
- Bennet angle set at average 15°.
- Curve condylar guide.
- Magnetic stabilization system of the condilar guide movement (built-in).
- Support for upper branch in open position.

## Standard face bow Ref. 010102-50

Medical Device

The Standard face bow is an apparatus used to record the spatial position of the patient's upper dental arch in relation to the skull and transfer the record to the articulator.

Transfer of the patient record is performed by setting the complete face-bow in the upper frame of the articulator.

## Elite face bow Ref. 010100-55

Medical Device

The new Elite face bow brings an articulated and fixation system for the fork that allows a faster registration process for the professional and comfortable for the patient. It has a jig transfer assembly that eliminates the needs for face-bow in the assembling process of the casts in the articulator, turning the process faster, more practical and stable. Its Naziun Relator with adjustable height, including an infra-orbital indicator, turns the registration process more precise. The face-bow is equipped with a sliding system which allows smooth lateral movement (opening/closing) and facilitates the overall use. The ear pieces are anatomical, removable and chemically sterilized.

Ref. 010099  
Articulator + Case

Ref. 010103  
Articulator + Case

Ref. 010107  
Articulator + Case

Ref. 010098  
Articulator + Cardboard box

4 models are perfectly compatible with face-bows Estandar and Elite.

### Range of accessories:

### DIMENSIONS

Model	Ref. 010098	Ref. 010099	Ref. 010103	Ref. 010107
Height (mm)	150	150	170	160
Width (mm)	180	170	170	148
Depth (mm)	180	180	180	180
Weight	0.540 kg	0.689 kg	0.735 kg	0.697 kg

### Model formers (for orthodontics training)

### Model formers (small striated base)

### Model base former

### Base former with magnet

- INSTRUCTIONS FOR USE
1. Fit the base former with the metal plate.
  2. Empty the impression as usual.
  3. Insulate the model and fit the magnet on the metal plate.
  4. Make the counterform that will remain fixed in the articulator by pouring coating plaster on the model; let it polymerize. Then separate the model carefully from the counterform (which can be reused for another model).

### Flat base former with magnet

## Hydraulic press Ref. 030350

The MESTRA hydraulic laboratory press is sturdy and pleasing to the eye. It is simple and easy to handle, and the latest trends in new materials have been applied to its construction. Its oil-hydraulic system is designed so that the oil cannot escape from the chamber. All parts subject to wear are made of ground hardened and tempered steel and finished with epoxy paint. The MESTRA press includes bottom plate recovery springs which enable it to be always in a ready-to-use position. The top plate diameter and the width between columns enable flask(s) to be inserted and removed with the MESTRA Ref. 030380 press flange without having to raise or lower the spindle, thus saving time and trouble.

### USEFUL SPACE

Height	235 mm
Width	140 mm
Piston maximum travel	25 mm
Maximum power admitted	15.200 kg = 400 kg/cm <sup>2</sup>
Maximum power recommended	9.500 kg = 250 kg/cm <sup>2</sup>

### MEASURES

Height	530 mm (screw down)
Width	225 mm
Depth	230 mm (without lever)
Diameter of table	125 mm
Weight	20 kg

## Verticulator Handy Basic Ref. 130100

This configuration, which we could call minimal or basic, is recommended for those users who wish to start with the system. With this combination it is possible to perform most of the works.

Powerful tool that fits with a multitude of dental prosthesis works, to elaborate or design: implant supported, hybrids, fixed and removable prostheses, full of composites or ceramics, relines, repairs, temporary prosthesis, etc.

## Set of paintbrushes

Ref. 050432 (21 units)

A complete selection of paintbrushes including round-tipped Marta Kolinsky ones, round-tipped Toray Oro ones, made in synthetic fibres, and also flat-tipped Toray Oro ones. Numbers 0, 1, 2, 4, 6, 8 and 10 are included of each type, so there are 21 paintbrushes altogether. All paintbrushes have a "rattle affect". This set is supplied in a practical imitation-leather case.

(L) 255 x (W) 124 x (H) 45 mm 0,233 kg

## Set of paintbrushes Ref. 050490 (6 pieces)

A selection of six high quality paintbrushes made in Marta Kolinsky hair. Each paintbrush has a cap that protects it against dirt and damp. This set includes the paintbrushes that are most used in Dental Labs (Round Plane N° 0, 2, 4, 6; Planes N° 2 and 4). This set is supplied in a practical case.

(L) 118 x (W) 72 x (H) 15 mm 0,086 kg

## Tool set (for orthodontics) Ref. 060403

DIMENSIONS

Ref. 060403 (L) 190 x (W) 135 (H) 30 mm  0,648 kg

Very complete. Vinyl case.  
It includes 19 tools.

- Straight scissors.
- Set of two pliers.
- Wire cutters.
- Curved mosquito tweezers.
- Crown measuring tool.
- Articulated tweezers for paper.
- Pen.
- Two knives for wax.
- Two carving tools.
- Two spatulas for cements.
- Lancet handle.
- Spatula with cavity.
- Four PK Thomas tools.

## Boxes for model transport Ref. 110000

Autoforming box perfect when transporting models and small objects (orthodontic or prosthesis tools, etc.) from the laboratory to the dental clinic. **The main advantages of the system are the following:**

- The box includes everything: there is no need of protective material, scotch tape, seal, or any other packing element.
- The box is ready in just a few seconds. It is extremely easy to assemble.
- Approved for posting or forwarding.
- Goods are transported hung by means of an ingenious system that protects them from vibrations.
- Elasticity of cling film allows it to adapt to any shape.
- Immediate opening, no need of scissors, cutters or any other tool
- When the box is opened out, it takes up little space, so it can be stored anywhere (10 times less than any other similar packaging).
- This system can be used several times, so it is an environmentally friendly product. It also has a 30% recycled paper, so it fulfils German RESY Regulation environmental requirements.

- It is supplied in packs of 100 units.

## Water and plaster dispenser *Precision* Ref. 080592

Optimized version of the Boomerang dispenser, with a new quieter peristaltic pump, a more precise weighing algorithm and a backlit alphanumeric display that allows a more intuitive and simple operation. Just press a button, and you will obtain a dose ready to be mixed. Besides its speed and precision, another advantage of this product is the saving of materials: when you dispense by hand, the trend is to increase the dose. However, with the Boomerang dispenser you will always obtain the exact dose, and the subsequent saving. According to our experience and estimates, the saving would be between 25 and 40%, quite important amount that will enable you to pay off the machine in a very short time. The machine has an electronic control which allow to alternate different types of powder (type II, III and IV) by just replacing the tank, to programme cycles, to work with fixed proportions, and so on. They are factory supplied with a rubber bowl to mix the plaster and a plastic spatula. Apart from that, an extra plaster tank (to alternate different types of powder) and a bracket to fix it to the wall is also included.

In case of a failure or obstruction in the dosage spindle, you can dismount and mount it again in less than two minutes, and no training in mechanics or special tools are required. Your hands are enough.

In the worst case, the whole tank unit is an economical element and easily replaced by the user himself. What in other machines are expensive works (maintenance, failures...) become routine works in our machine.

Perishables:  
spindle (2 units)

**Iris II vacuum mixer** Ref. 080516  
**Iris II Evolution** Ref. 080517  
**Iris II Evolution Inverter** Ref. 080517 E  
**Iris II Evolution Advanced** Ref. 080518

Economical and useful vacuum mixer. Just place the bowl and press the operation key and the mixer will start up. In a few seconds the mixture will be ready.

As there are four versions available, you will find the model that best suits your needs. Despite the differences in their control system, all the versions share the same motor-pump-chassis structure of well known solidity and reliability.

The IRIS vacuum mixer has been designed to be hanged on the wall. However, whenever it is no possible, there is an optional support available.

SPECIFICATIONS

Model	Iris II	Iris II Evolution	Iris II Evolution Inverter	Iris II Evolution Advanced
Time range	0/120"	0/300"	0/300"	0/300"
Rpm. and rotation	240 ↺	100-400 ↺	100-400 ↻	100-400 ↻
Power	100 W	100 W	100 W	100 W

(L) 520 x (W) 300 x (H) 360 mm 7,000 kg

New optimized version of the well-known IRIS vacuum mixer. Among the improvements introduced we can point:

- Mixing spin inversion.
- Backlit alphanumeric display.
- New electronic controls for a more intuitive and simple programming.

**Optional support**  
 Ref. 080519

(L) 270 x (W) 260 x (H) 720 mm 8,000 kg

We have a wide range of bowls, from 250 cc to 1250 cc.

The standard bowl has 550 cc and it is completely made of transparent polycarbonate. This material is very flexible and practically unbreakable.

The blade is also made of polycarbonate, and it deserves a closer look:

- In case the mixture dries up, the flexibility of the blade allows you breaking the remains of plaster easily.
- Polycarbonate is a non-stick material, and thus the cleaning is very easy.
- The injected plastic allows building blades of more hydrodynamic shapes than the traditional metal plate. This makes the mixing easier.
- The unit is mechanically simpler, so the number of failures and the maintenance decrease.

(L) 500 x (W) 470 x (H) 490 mm 13,000 kg

## Koala vacuum mixer Ref. 080520

It is equipped with a powerful and solid stepdown motor with nylon gears (less noise and friction), and a two-body high vacuum pump. The Koala mixer makes mixing of coating, plaster, and other materials possible.

Thanks to its electronic control it is possible to easily introduce the operating time and also to choose cycles of only vacuum, or mixing + vacuum. With the programme switch cycles up to 3 steps can be defined.

These are very useful when working with certain techniques. This machine is supplied with all necessary elements in order to fix it to the wall and with two bowls of 250 cc and 550 cc.

There are also other accessories available like a fastening arm for bowls (for mixing without vacuum technique), and a base to turn the mixer into a tabletop model.

Ref. 080522

### SPECIFICATIONS

Power	250 W
Voltage	230 V. 50/60 Hz.
Speed	240 rpm
	Each 10"

## Tabletop base

(for vacuum mixer) Ref. 080521

This base turns the Koala Mixer into a tabletop model. It has holes at 3 different heights, so the Koala can be placed at the height that best suits the user.

9 kg

(L) 600 x (W) 420 x (H) 440 mm 10,000 kg

## Bowls for vacuum mixers

Koala Vacuum Mixer has one of the largest range of bowls available in the market, with capacities of 250 cc.; 550 cc.; 750 cc.; 1.000 c.c.; 1.250 c.c.; and 230 cc. (specially designed for alginate mixing). All of them are made of resistant transparent polycarbonate. Ref. 080529 Stainless steel.

## Mulhacén model trimmer - Sandpaper

Ref. 080093

## Mulhacén model trimmer - Carbide

Ref. 080094

## Mulhacén model trimmer - Diamant

Ref. 080095

Modern and versatile model trimmer. It features a powerful 1600 W motor with integrated brake, opening lid for easy access to the disc, operation warning light, discs with hook-and-loop type (Velcro®) fastener, sophisticated cleaning system, adjustable worktable... and an endless list of elements which make it – probably – the most complete model trimmer in the market. Unbeatable quality/price ratio.

- Easily removable cover (wide-opening hinge). Easy to clean and easy access to the disc.
- Made of very strong technical plastics.
- Corrosion free

Ref. 080096

## Mulhacén model trimmer - Sandpaper DRY Ref. 080096

The main characteristic of the trimmer is that the surfacing operation is performed dry.  
 -Stability of the material to be trimmed, since it is not wet.  
 -Higher performance and longer life, minimal effort.  
 OPTIONAL EXHAUSTER (ESSENTIAL).

## Serantes model trimmer

*Sandpaper disc trimmer* Ref. 080097

*Diamant disc trimmer* Ref. 080098

*Sandpaper disc - DRY trimmer* Ref. 080099

Ultra compact. It may be the trimmer currently on the dental market, with smaller dimensions. The concept of him derives directly of the **Mulhacén model (080093)**, with which it shares many of its performance and characteristics, except for dimensions. In this sense we can speak of a powerful 1600 W motor with integrated brake, lid with easy opening to access the disc, discs with easily changeable hook / loop type fixation, water cleaning system, high resistance composite manufacturing and of course no corrosion, etc.

Ideal for general dental applications and especially for those environments in which the user does not have much space, but who nevertheless does not want to give up the possibilities that a completely professional trimmer offers in terms of productivity and quality: the size of the table and window have been studied so that it can be used in jobs similar to those carried out on larger trimmer models.

The Serantes trimmer is supplied in three different versions, all of them with a hook/loop disc fixing system:

- With a choice of conventional 80 or 120 grain abrasive disc. General purpose version ideal for any dental user.
- With diamond disc: Designed for demanding environments in those that speed and productivity are key aspects.
- Dry, without water circuit: Designed for environments where the water supply and drainage are difficult to install or for professionals who do not want to wet the models.

Serantes is fully compatible with the MESTRA range of decanters. Supplied with 2 sandpaper discs.

## Model trimmer (Classic)

The MESTRA model trimmer is a strong and robust machine, featuring the latest improvements and innovations required by a machine of these characteristics. Its robustness can be seen at a glance and its weight of more than 21 kg (maximum on machines of this type) added to the use of non slip rubber feet assures perfect stability during facing operations. It runs noiselessly as the special resin wheel is carefully balanced. The wheel is mounted on an aluminium plate, thus achieving a larger working area as it has no shaft or external nut hinder grinding operation in this area. The motor is provided with guards, giving a more compact and harmonious appearance, while ensuring safe operation, preventing any possible accident. The MESTRA trimmer is equipped with an electro-valve for electronic feed of water by pressing a switch.

This switch is protected with a PVC insulating cover to prevent any electric shock due to humidity. It also has an earth cable. Water flow is directly adjusted from the machine through an adjustment valve. The drainage system is of lateral type, designed to prevent clogging as the drain hole is oversized 30 mm and the water carrying plaster particles is driven outward by the air turbulence generated by the wheel. The component supporting the patterns is of tilting type with three positions. The motor is monophasic, and is insulated from the wet area of the machine by means of a retainer with a stainless steel spring for a perfect fit on the motor shaft end. The motor shaft is made of hardened and ground stainless steel.

The MESTRA model trimmer is entirely made of aluminium except a few components made of stainless steel. The machine is painted with epoxy paint, and always looks as good as new.

## Which trimmer should I choose?

The Classic series trimmer family consists of five products. Although all the trimmers share the same concept and performance, there are several special features that make them different.

### 1500 rpm silicon carbide disc trimmer Ref. 080080

Due to its low speed, the main advantage of the trimmer is its easy handling, its silent operation and the scarce splashing it produces.

Thus, it is recommended for professionals not very familiarized with trimming who work in places that have to remain clean or in places where they cannot make too much noise.

### 1500 rpm diamond disc trimmer Ref. 080081

Similar features of the previous trimmer, but with a diamond disc. The diamond disc, if used properly, has a much longer working life.

Besides, the trimming surface is maintained completely flat, with no wear scratches. Its price, however, is higher.

### 3000 rpm silicon carbide disc trimmer Ref. 080082

It is the model that best meets the requirements of the dental lab. Its trimming power is very high, and it can cope with a heavy workload in a very short time. Recommended for experienced professionals working in places where a little more noise or splashing is not a problem.

### 3000 rpm diamond disc trimmer Ref. 080083

Identical features of the previous model, but with a diamond disc.

## RDS-1 trimmer

Ref. 080084 **DRY**

The main characteristic of the RDS-1 trimmer is that the surfacing operation is performed dry, with a diamond disc at 1.500 r.p.m.  
 - Stability of the material to be trimmed, since it is not wet.  
 - Higher performance and longer life, minimal effort.  
 OPTIONAL EXHAUSTER (ESSENTIAL).

## Decanter (19 l.)

Ref. 080085

Made of resistant polypropylene. It has been specifically designed for a quick and easy cleaning, since dirt is collected in a plastic bag. The lid closes hermetically and prevents the spread of bad smells. Its size and shape have been designed for the unit to be easily installed under the sink.

Height	465 mm
Diameter	400 mm
Capacity	19 l
Weight	3.2 kg

	(L) 500 x (W) 430 x (H) 430 mm		4.5 kg
-------------------------------------------------------------------------------------	--------------------------------	-------------------------------------------------------------------------------------	--------

## Decanter (14 l.)

Ref. 080087

Similar features to the Ref. 080085, but smaller (14 l.)

Height	345 mm
Diameter	350 mm
Capacity	14 l
Weight	2.2 kg

	(L) 360 x (W) 360 x (H) 340 mm		2.8 kg
---------------------------------------------------------------------------------------	--------------------------------	---------------------------------------------------------------------------------------	--------

## Decanter (18 l.)

Ref. 080086

- Made of stainless steel
- With plastic lid to prevent smells

Height	290 mm
Width	450 mm
Depth	230 mm
Weight	6.5 kg

	(L) 520 x (W) 300 x (H) 350 mm		7.5 kg
-------------------------------------------------------------------------------------	--------------------------------	-------------------------------------------------------------------------------------	--------

## Decanter (70 l.) Ref. 080089

It is made in highly resistant fibreglass with a total capacity of 70 l. and a design that allows an easy installation under the sink.

It also has wheels which make its movement easier. Cleaning and emptying operations are easy because of the optimum access to the cube.

This machine is supplied with all the couple nuts and accessories for its installation.

Height	615 mm
Width	520 mm
Depth	600 mm
Weight	10 kg

	(L) 650 x (W) 650 x (H) 650 mm		15 kg
---------------------------------------------------------------------------------------	--------------------------------	---------------------------------------------------------------------------------------	-------

**Inox**

## Interior trimmer Ref. 080102

The MESTRA interior trimmer is carefully designed to facilitate trimming work in dental laboratories. It comes in a compact, fully stainless steel built unit which is easy to clean and totally corrosion-resistant. Its large sitting surface and non-slip rubber feet make the unit stable and prevent vibrations or unwanted movements during use. Its powerful 1/3 HP, 3000 rpm motor ensures optimum cutting power and smooth, quiet operation. The trimmer is designed to work with 6 mm shank diameter drills.

The worktable is perforated to drain off the dust caused during denture trimming, and has an outlet tube which can be connected to an external exhauster. At the rear there is a Schuko type power connection which is very useful when an exhauster is used. The interior trimmer has a safety switch to protect against unexpected start-ups and a drill protection screen.

It meets EC regulations, and is supplied with one 12-tooth hard-metal drill.

### SPECIFICATIONS

Monophasic motor / Rated power	250 W
Speed	3000 rpm
Voltage	230 V 50/60 Hz
(L) 520 x (W) 290 x (H) 360 mm	12,500 kg

## Burs for interior trimmer

These burs are made of tungsten with grooving serration and are available in two different outlines: cylindrical and rounded conical. The rounded conical bur is supplied with three different kinds of serration: n°5 X (standard), n°3 and n°6 (fine). On the other hand, the cylindrical bur is supplied with serration n°3 and n°6. Dimensions: head diameter 12,5 mm; total length 77 mm.

	Type		(L) x (W) x (H)

Ref. 080108	Tungsten cylindrical (serration)	0,052 kg	85 x 22 Ø mm

## Atlas Pin drill Ref. 080610

Easy to handle, the machine allows to drill precision holes in the lower part of the model.

Changing and adjusting the bit is an easy and intuitive operation.

The machine works silently and without vibration. The laser in the upper part of the machine allows to locate exactly the place to drill. Its size, simplicity and ergonomics make it the ideal device for the technique of individualizing pins.

The machine is factory supplied with 2 burs: 1.85 mm and 1.95 mm

Details are very important when designing a good pin drill: the drill-anchoring system has to be easy to loosen.

In the case of the Atlas pin drill, a few seconds are enough to replace the drill or adjust its height.

The table can easily regulate the depth of the drill: you just have to turn a screw to adjust the height at will.

**TEIDE 1** Ref. 080021

## Electrovibrator

With the arrival on the market of the Teide Cima vibrator, a set of innovations until now unknown in similar products of the dental sector were introduced. Among them, we can highlight the possibility of choosing between four types of different frequency, the incorporation of a practical timer, a fully digitized control, or a new and practical ball pouring system. After these years, we had to update and modernize our Teide, launching a new version that improves the performance of the previous model. Among the most significant developments we can point out:

- **Control completely renewed:** it incorporates an intuitive graphic display with which the operation of the device is much simpler.
- **Improved waveforms:** Although the vibration frequencies are the same (they were already optimized in the previous version), the waveform has been modified by smoothing it.
- **Improvements in the electromechanical system:** That, combined with those of the previous point, increase efficiency without implying an increase in noise and vibration.
- **Excellent reliability:** through a complete mechanical and electrical redesign work, the robustness of the set has been improved, achieving a practically "indestructible" product.

Our Teide model also gets benefit from the change of control. Although this model incorporates two different frequencies, the waveform is also optimized, which allows an improvement in efficiency without increasing noise and transmitted vibration. The electromechanical reliability improvements are also extended to this model, making it the most balanced option in the family. Performance and simplicity in perfect balance.

Accesorio:  
Ref. 080022-10

The "Teide 1" model is still the simplest option of the three, but no less interesting. We must mention its ease of use and excellent reliability. Of course, it also shares with the rest of the range, the advantages common to the entire Teide family.

**Timer Button:**  
It allows to select between four different times. It also has a continuous operation mode.

**Power button**  
The power of the vibrator can be gradually increased in 5 levels. The synoptic display is very useful.

**Vibration type button**  
The user can choose between 5 different types of vibration, optimizing the vibration for any type of mass due to its viscosity, humidity, nature, etc.

### SPECIFICATIONS

Voltage	220 V. 50 Hz. / 115 V. 60 Hz.

----------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------

## Pouring ball

The pouring ball is very practical. Leaning on it the impression tray or the bowl, the material will flow smoothly and without bubbles, filling any gap.

In case it is not necessary, it is possible to remove quickly and easily. rápida y sencilla.

The dimensions of the table have been carefully calculated. It is intended to fit the maximum possible number of cylinders of different sizes, in the minimum possible area. After a complete combinatorial exercise, our engineers concluded that a table of 220 x 180 mm is the best possible relationship.

The basic forms have been designed to prevent possible plaster remains reaching the inside of the machine. The working environment of a vibrator is especially dirty. Therefore, **the edges of the rubber table (1), the sinking of the control panel (2), and the roundness of the corners (3)** are details that prevent dirt entering. In addition, all surfaces are perfectly smooth, allowing excellent cleaning.

The legs represent an important advance in the reduction of vibrations. Traditionally, the legs of a vibrator were designed as suction cups to be fixed to the table; or as hollow pivots of high flexibility. **MESTRA** engineers managed to combine both approaches by designing legs with a suction cup shaped end and a hollow body. The result of such an ingenious solution is surprising: the vibrations and noise transmitted to the table are drastically reduced.

## Large electrovibrator Ref. 080010

Made of steel plate. Epoxy paint. Equipped with illuminated start/stop switch. Potentiometer for progressive adjustment of vibrations. Resting on suction pads. Working plate made of rubber on a metal body.

### DIMENSIONS

### DIMENSIONS

(L) 235 x (W) 235 x (H) 105 mm	6,300 kg
Working area	220 x 220 mm
 (L) 310 x (W) 310 x (H) 190 mm	7,000 kg

## Rectangular electrovibrator Ref. 080025

Similar features to those of the Square Electro Vibrator, except for its dimensions: 220 x 160 mm.

### DIMENSIONS

(L) 235 x (W) 170 x (H) 105 mm	6,200 kg
Working area	220 x 160 mm
 (L) 310 x (W) 310 x (H) 190 mm	6,900 kg

## Round electrovibrator Ref. 080030

Its body is made of white colour anodized aluminium, and rests on suction pads. The working surface is made of rubber on a metal body and has a recess of 30 mm for inserting the tray. It is equipped with a potentiometer, a selector switch (+,-) for stepped adjustment of vibrations, and an "ON" light.

### DIMENSIONS

(L) 152 x (W) 152 x (H) 100 mm	2,500 kg
Working area	120 mm
 (L) 310 x (W) 310 x (H) 190 mm	3,000 kg

## Electrovibrator rectangular Ref. 100197

Robust and reliable and economical. It allows adjusting the power level and the vibrating mode (2 frequencies). The upper rubber cover is easily dismantled to clean the unit.

### DIMENSIONS

(L) 275 x (W) 215 x (H) 100 mm	5,560 kg
Working area	260 x 190 mm
 (L) 315 x (W) 260 x (H) 120 mm	6,270 kg

## Round electrovibrator (small) Ref. 100200

Strong and reliable vibrator at an outstanding price. 4-position power control.

### DIMENSIONS

(L) 127 x (W) 127 x (H) 90 mm	1,600 kg
Working area	125 mm
 (L) 200 x (W) 160 x (H) 90 mm	1,980 kg

## Model saw Ref. 080614

Ideal tool for working with the technique of individualization. Its diamond blade it is only 0.3 mm. thick. This machine puts special care on safety, making almost impossible an accident. Elegant, handy to use and with a very attractive price.

### SPECIFICATIONS

Power	200 W
Voltage	220-240 V 50/60 Hz
R.P.M.	6.000
Height	290 mm
Width	223 mm
Depth	260 mm
Weight	6,31 kg

(L) 520 x (W) 300 x (H) 360 mm 7,410 kg

## Indigrap Ref. 050340 (10 units)

(L) 180 x (W) 80 x (H) 110 mm 0,540 kg

## Die tray system

Ref. 100206 (10 units)

Designed to be used as individualiser. The method used is very simple, intuitive and very well known. Its low cost is another strong point of this technique

(L) 190 x (W) 70 x (H) 90 mm 0,345 kg

## Composite heater Ref. 080077

Mestra composite heater is a device that allows to keep the syringes of composites, adhesives or other materials used in the dental laboratory warm until the moment of use. With capacity for 8 syringes, it allows you to choose between three different temperatures (40, 50 or 70 °C), to facilitate the handling of composites, improving their fluidity.

### SPECIFICATIONS

Height	135 mm
Width	97 mm
Depth	110 mm
Weight	0,742 kg
Temperatura	40-50 y 70°C
Diameter of holes	16 mm
Voltage	100 - 240 V

## Wax heater

(high capacity) Ref. 080076

Similar to the Ref. 080078 Water Bath, but in this model the controls allow to regulate a wider range of temperatures and the tank is teflon coated.

Thanks to these two modifications, you can keep a considerable amount of melted wax in the tank, ready to be used in different lab techniques.

### SPECIFICATIONS

Height	146 mm	Voltage	230 V
Width	230 mm	Temperature range	30-100 °C
Depth	195 mm	Power	310 W
Weight	1,700 kg	Capacity	1 l.

(L) 300 x (W) 300 x (H) 200 mm 2,000 kg

## Water bath Ref. 080078

This machine is extremely useful when working with applications that need a water bath that keeps the water temperature accurately (polymerisation of small elements, wax sheets for biting registers, etc). It has a 1 litre stainless steel tank and it is easy to clean. The body is made in high density polyurethane, resistant to chemical agents. Bath temperature control is made by an electronic thermostat easy to use and accurate when keeping the programmed temperature. Temperature range is from 30 °C to 75 °C. A powerful heater allows reaching the set temperature in a few minutes.

### SPECIFICATIONS

Height	146 mm	Voltage	230 V
Width	230 mm	Temperature range	30-75 °C
Depth	195 mm	Power	310 W
Weight	1,700 kg	Capacity	1 l.

(L) 300 x (W) 300 x (H) 200 mm 2,000 kg

## Wax heater (for dipping)

Ref. 080075

It has electronic control via microprocessor to ensure that the set temperature entered by the user is very accurately maintained. The working temperature range is from 50° C to 99° C.

### SPECIFICATIONS

Voltage	230 V.
Power	30 W
Tank	Ø 35 ↑35

(L) 150 x (W) 120 x (H) 120 mm 0,630 kg

## Wax heater Ref. 080070

No superfluous decorative elements are provided on its front. This makes it more functional, as drops of wax inevitably fall on this area when the spatula is being inserted and removed, which would damage the controls. The wax heater is set for a temperature of around 85 °C, which melts wax in 8 to 10 minutes.

### SPECIFICATIONS

Height	60 mm	Voltage	230 V 50-60 Hz
Width	150 mm	Earth connection	
Length	140 mm	Power	60 W
Weight	1,1 kg		

(L) 215 x (W) 155 x (H) 64 mm 1,100 kg

## Immersion heater

Ref. 100126

It can melt the wax in a few minutes and keep the temperature within a narrow variation range, which ensures the stability of the physical properties and therefore a high precision when making the crown. The electronic display is clear and the actual temperature in the tank and the set-point temperature can be easily checked. The heater can be regulated in Fahrenheit and Celsius degrees.

### SPECIFICATIONS

Voltage	230 V
Temperature range	50-120 °C
Power	60 W

(L) 240 x (W) 180 x (H) 90 mm 0,835 kg

## Immersion heater

(3 tanks) Ref. 100123

Similar to the Ref. 100126 immersion heater, but it features three tanks to heat three different types of wax, with independent temperature adjustment in each tank. The display shows continuously the real and set up temperatures in each tank.

### SPECIFICATIONS

Voltage	230 V
Temperature range	50-120 °C
Power	60 W

(L) 240 x (W) 180 x (H) 90 mm 1,190 kg

## Wax heater Ref. 080071

Very simple and easy to use. Just enter an operating temperature, and the electronic control system keeps the programmed temperature to a surprising degree of accuracy and shows it on an illuminated screen. Its strong plastic frame and membrane keypad prevent wax from filtering inside the device. The tank is divided into four independent compartments so that as many different types of wax can be heated. The teflon coating of the tank makes cleaning operations easier.

### SPECIFICATIONS

Height	70 mm	Voltage	230 V 50-60 Hz
Width	192 mm	Temperature	50-120 °C
Depth	114 mm	Power	120 W
Weight	1,1 kg		

(L) 250 x (W) 180 x (H) 90 mm 1,100 kg

## Wax heater Ref. 080072

Similar to the Ref. 080071. The only difference is that the tank is divided into four independent compartments so that as many different types of wax can be heated. The teflon coating of the tank makes cleaning operations easier.

### SPECIFICATIONS

Height	70 mm	Voltage	230 V 50-60 Hz
Width	192 mm	Temperature	50-120 °C
Depth	114 mm	Power	120 W
Weight	1,1 kg		

(L) 250 x (W) 180 x (H) 90 mm 1,300 kg

## Gas burner

Ref. 100001

Highly practical and easy to use. It is equipped with an atomizer head with 1.300 °C flame temperature and 2 hours autonomy with full tank. Burning is through an automatic piezoelectric device and flame can be regulated.

(L) 130 x (W) 90 x (H) 120 mm 0,275 kg

## Blowtorchs and burners

Ref. 050210 (L) 65 x (W) 74 x (H) 18 mm 0,063 kg

## Electronic spatula

(for wax modelling) Ref. 100007

Its ergonomics, ease of use, and small size make it an optimal tool for this kind of work. The accuracy of the electronic controls is also remarkable, since it maintains the temperature in the spatula head within a narrow error margin.

The working temperature can be read on the digital display in the controls box. The device is factory supplied with two different heads, adaptable to the most commonly used shapes in the dental lab.

### SPECIFICATIONS

Height	65 mm	Voltage	230 V
Width	75 mm	Temperature	50-200 °C
Depth	120 mm	Power	12 W
Weight	0,650 kg		

(L) 250 x (W) 180 x (H) 90 mm 0,985 kg

## Double electronic spatula

(for wax modelling) Ref. 100008

Similar to the Ref. 100007, but with two heating heads instead of one.

Thus, the temperature can be controlled while working the wax, without handling the controls box. The device is factory supplied with six different heads and, therefore, it can be adapted to the most common shapes used in the dental lab.

### SPECIFICATIONS

Height	70 mm	Voltage	230 V
Width	150 mm	Temperature	50-200 °C
Depth	120 mm	Power	20 W
Weight	0,900 kg		

(L) 250 x (W) 180 x (H) 90 mm 1,020 kg

## Surveyor Ref. 050310

Concentric clamp for 2 mm rods.

COMPONENTES INCLUDED:

- Wax knife.
- Analyzing rod.
- Rod with: 0,25 - 0,50 - 0,75 ribs.
- Holder with loads (6 u.) Ref. 050310-35

(L) 315 x (W) 315 x (H) 200 mm 0,076 kg

## Milling support

(V-3 parallelometer)

Ref. 080410

### Elements included:

- Parallelometer.
- Wax knife Analyser rod.
- Rods with 0,25, 0,5 and 0,75 ridges
- 2 Allen wrenches, 5 bushings for fitting different hand tools.
- Drill hold.
- Hand piece not included.

(L) 520 x (W) 300 x (H) 360 mm 11,000 kg

## Electronic spatula

(for parallelometer)

Ref. 100006 A  
B  
C

Ø 3, 2.35 or 2 mm fixing shaft (diameter to be chosen when ordering). Ideal to be fitted in a parallelometer, micro-drilling support or similar device for modelling wax pieces. It is factory supplied with a complete tip set and an electronic control box. The control box allows an accurate adjustment of the working temperature of the tip by showing it on the digital display.

### SPECIFICATIONS

Weight	0,650 kg	Height adaptor	23 mm		

(L) 240 x (W) 180 x (H) 90 mm 1,000 kg

## Light curing pattern Ti-Light

Imagine a product with the same characteristics, texture and formability as conventional modeling wax. Imagine that the same product, after being modeled, allows curing with a simple lamp, thus acquiring the own characteristics of a composite. Finally, also imagine that the modeled skeleton can be coated and casted following a conventional process, without appearing tensions, contractions, sinking or ashes. Can you imagine now the time and consumable that you would save with that material?

### Content of the start-up kit Ref. 110001

Description	Quantity
Molar clasps (18 pieces)	1 sheet
Premolar clasps (18 pieces)	1 sheet
Skeleton sheets	1 sheet
Stipple sheet 0.35 mm	1 sheet
Stipple sheet 0.45 mm	1 sheet
Stipple sheet 0.45 mm	1 sheet
Lingual bar	1 piece
Palatal bar	1 piece
Palatal bar	1 piece
Palatal plate	1 piece
Reinforcing rods (thick)	5 pieces
Reinforcing rods (thin)	5 pieces
Finishing lines	1 piece
Glue (polymerizable)	5 g.
Separator L	20 ml
Separator D	20 ml
Separator F	20 ml

Light curing pattern Ti-Light is available in several presentations: an initiation kit that includes all the elements necessary to perform skeleton modeling work; replacement boxes with different pre-formed elements (hooks, grilles, plates, reinforcements, etc.); and adhesives and separators that complement the family.

Modeling with Ti-Light® begins by preparing the model: preparation waxes, separating agents, etc. can be used.

Once the model is ready, the different elements that make up the skeleton are added.

The Ti-Light® family has a wide variety of pre-formed elements (hooks, bars, etc.) that make modeling work much easier.

 (L) 210 x (W) 155 x (H) 85 mm  0,380 kg

The union between the different elements of the skeleton is simple. Depending on the case, they can be glued by joining them together and then pressing them with your finger; or adding some Ti-Light® adhesive.

After the modeling phase is finished, polymerization is carried out in a conventional polymerizing lamp. When Ti-Light® wax is ready, its color changes from pink to yellow.

After polymerization, reinforcements, inserts, etc., of conventional wax can be added. To remove the preparation waxes, steam can be used.

Once the skeleton is removed, Ti-Light® allows polishing and finishing operations.

Sprues, vents and similar elements of conventional wax can be inserted in the modeled skeleton. The coating and casting of the skeleton is done following conventional methods.

## E2 Washing and polymerizing machine (Stainless steel) Ref. 080060

**Inox**

Chassis completely made of stainless steel

### SPECIFICATIONS

Voltage	230 V - 50 - 60 Hz
Power	2200 + 400 W
Height (without knob)	450 mm
Width (with key)	405 mm
Length	635 mm
Weight	34,000 kg
INSIDE DIMENSIONS	(L) 400 x (W) 320 x (H) 350 mm

**Polymerization:** 12 flask with Ref. 030380 clamps. 95° C.  
**Scalding:** 6 flasks (open type) (±8 minutes) 85 °C.  
**Casing:** Stainless steel

 (L) 740 x (W) 520 x (H) 680 mm  44,000 kg

The E2 washing and polymerizing machine is equipped with a processor to control the temperature according to two set programmes.

1. Shower programme
  - a) The computer or the user can set a temperature (e.g. 80 °C) so that the E2 washer/polymerizer is ready to shower at all times.
  - b) Shower time required.
2. Polymerization programme
  - a) Delayed start time in hours and minutes from 0.00 to 99.59. This means the programme can be set to run at a particular time. This delay works each time the programme is started.
  - b) Duration of each controlled temperature increase gradient in hours and minutes from 0.00 to 99.59.
  - c) Required holding time at each temperature plateau in hours and minutes from 0.00 to 99.59.
  - d) Shower time required.

The washing system with 6 high-pressure water injectors ensures proper scalding of flasks and perfect wax removal.

Fast spray tree assembly & disassembly system.

Large compartment with room for 6 clamps with 2 flasks each

Drain cock

## Washing machine cabinet (Stainless steel) Ref. 080050

**Inox**

Completely made of stainless steel. Together with the Ref. 080060 Washing and Polymerising Machine, they make a practical, aesthetic and unchanging combination in dental labs. It has three inner shelves in order to keep adequately flasks, clamps and any other material used in polymerizing processes.

### SPECIFICATIONS

 (L) 640 x (W) 370 x (H) 680 mm  22,000 kg

 (L) 740 x (W) 520 x (H) 920 mm  30,000 kg

**Inox**

## M-9 Polymerizer M-18 Polymerizer

Ref. 080400  
Ref. 080402

Chassis completely made of stainless steel

### Ref. 080400

Made completely of stainless steel. Polymerizes 9 flasks with the 030390 clamp. The M-9 polymerizer is equipped with a processor to change the temperature according to a pre-set programme.

On the M-9 the operator (user) can select the following:

- A delayed start time set in hours and minutes from 0.00 to 99 hours 59 minutes. This means the programme can be pre-set to start at a specific time. The delay works every time the programme is initiated.
- The duration of each temperature increase gradient in hours and minutes from 0.00 to 99 hours 59 minutes.
- The desired holding time in hours and minutes from 0.00 to 99 hours 59 minutes at each plateau.

### END OF TREATMENT WARNING BUZZER

- When the programme completes the treatment or A4, a modulated warning buzzer is set off for one minute. When the alarm buzzer sounds, press any key to acknowledge the alarm and continue the programme.
- If the power fails, the regulator stores all its data, and when the power returns it continues from the same point in the programme.
- Programmes and parameters are stored indefinitely when the power to the regulator is cut off.

Room for 3 clamps with three flasks each.

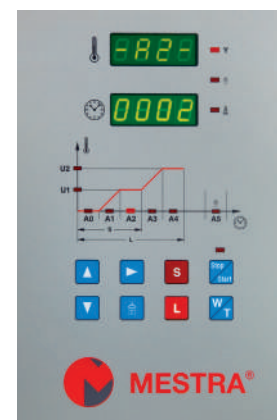

### Ref. 080402

It is exactly the same as the Ref. 080400 except for its size. It can hold up to 18 flasks.

### MICROPROCESSOR

- Time & temperature control.
- Buzzer to indicate end of program.
- Last program memory.
- Automatic disconnection.
- Triac for heating control.
- Thermocouple breakage indicator.
- Protection against voltage variations.
- Protection against electrical power cut.

ERGONOMICS: Double display. Graphic indicating the state of the machine

### SPECIFICATIONS

	M-9	M-18
Voltage	230 V - 50-60 Hz.	230 V - 50-60 Hz.

**Inox**

**NEW**

**POLI Magic-9 Polymerizer** Ref. 080405

**POLI Magic-18 Polymerizer** Ref. 080407

The **POLI** controls family has been developed as an economical alternative to the **MESTRA**'s standard electronic controls. Their performance and features meet perfectly the needs and expectations of most of the users, but at a very appealing price. And this is why they are particularly recommended for clients who have not very special operation requirements. Apart from the price, another advantage is their easy operation and programming. The **POLI** line is available for the **M9** and **M18** Polymerizers and for the **E2** washeRef. polymerizer.

### MICROPROCESSOR

- Time & temperature control.
- Buzzer to indicate end of program.
- 5 memories.
- Automatic disconnection.
- Triac for heating control.
- Thermocouple breakage indicator.
- Protection against voltage variations.
- Protection against electrical power cut.

**Inox**

**NEW**

### FEATURES:

- Delayed start time from 99 h. 59 min.
- Time to reach and to maintain the temperature from 00.00 to 180 m.
- Water temperature (max: boiling).
- Buzzer and automatic disconnection.

### Ref. 080405

Room for 3 clamps with three flasks each.

### Ref. 080407

It is exactly the same as the Ref. 080400 except for its size. It can hold up to 18 flasks.

## **Poli-Plus** (pressure polymerizer) Ref. 080460

Made of stainless steel. Tank of anodized aluminium with triple safety system when opening and closing the lid. Its automatic computerized control makes possible a time-controlled start-up, and controlling the rises and maintenance of the temperatures. When the working cycle finishes, there is a manual discharge and an automatic disconnection.

**Inox**

### SPECIFICATIONS

Maximum operating temp.	135° C
Maximum operating pressure	6,5 bars
Tank capacity	135 $\updownarrow$ 115 mm
Power	1.000 W
Voltage	230 V 50/60 Hz

(L) 420 x (W) 600 x (H) 440 mm 23,000 kg

## Clamp (for pressure-vessel)

Ref. 030000

Made of hardened duralumin

Ref. 030000

## Pressure vessel

(for self-polymerizing resins)

Ref. 030010

OUTSIDE DIMENSIONS		INSIDE DIMENSIONS	
Height	165 mm	Height	115 mm
Diameter	123 mm	Diameter	103 mm

Weight 1,600 Kg.

## Pneumatic container

(for casting rings) Ref. 040210

## Curing light Ref. 100035

It is cheap but sturdy and reliable. It has an illuminated chamber with four fluorescent compact lamps (total light power 9 W x 4= 36 W) from 400 to 550 nanometers.

It has a wide interior tray to place up to four models to polymerise at the same time. Operational time is selected with a timer from 0 to 15 minutes. When the cycle finishes, the machine emits a warning acoustic signal.

### SPECIFICATIONS

Height	115 mm
Width	215 mm
Depth	295 mm
Weight	2 kg
Voltage	230 V 50/60 Hz
Power	40 W
Nonometers	350/400

(L) 435 x (W) 270 x (H) 260 mm 3,760 kg

## Sun Beam curing light

Ref. 080550

This Curing Light is completely made of stainless steel.

It scans ultraviolet light among 280 and 550 nanometers, covering most wavelengths used in curing dental materials.

It is a general purpose machine, essential in dental clinics and laboratories. Its main features are: time electronic control with digital display; acoustic signal of end of cycle and an encoder type unique control programme; optimum access to the inside chamber of the machine by a door on the top; automatic warning of lamp change (each 500 working hours); revolving support so that light is better distributed (Ø 135 mm); panoramic view from porthole on the top of the machine; and security switch that switches off lights when the door is opened. Sun Beam curing light is supplied with a practical support for prosthesis (MESTRA Ref. 080550-50) and a bag with fixing pins.

Ref. 080550-50

### SPECIFICATIONS

Range	280/550 nanometers
Voltage	230 V 50/60 Hz
Ø plate	135 mm
Time range	3/20 min.
6 Lamps	3 mod. 9 W/78 UVA y 3 mod. 9 W/71 UVA

(L) 520 x (W) 300 x (H) 360 mm 7,500 kg

## Curing light Ref. 100037

LED lamp, valid for the vast majority of materials.

### SPECIFICATIONS

Height	107 mm
Width	200 mm
Depth	285 mm
Weight	1,2 kg
Voltage	240 V 50/60 Hz
Power	65 W
Nonometers	320/500 Peak 405

## Light curing plates - Pink (box 50 u.)

MESTRA curing plates for the fabrication of custom trays and bite plates for the production of wax mounts. Its slight transparency allows to perceive marks on the model.

Thickness: 2.2 - 2.4 Ref. 130320  
Thickness: 1.4 Ref. 130322

## Megatray Light curing plates - Pink (box 50 u.)

Megatray curing plates for the fabrication of custom trays and bite plates for the production of wax mounts. Its slight transparency allows to perceive marks on the model.

## Vestacast induction casting machine (stainless steel) Ref. 040061

A compact high-performance tabletop induction melting machine that is easy to operate. Despite being equipped with a sophisticated electronic control system, its operation has been simplified so it is as easy to use as a conventional centrifuge. The frame is 100% stainless steel. It is also quite powerful (2 600 w) and has manual power/temperature control, which enables it to melt metals up to 1750° C. In general, it can melt any dental alloy with the exception of titanium and its alloys. The main advantages of Vestacast can be summarised as follows:

- 1) Excellent energy performance: high melting capacity with low energy consumption.
- 2) Uniform melting with very little loss of material. Considerable reduction in the finishing work when using the Vestacast.
- 3) Very compact. Easy to maintain and operate.

### SPECIFICATIONS

Height	360 mm
Width	565 mm
Length	640 mm
Weight	55,500 kg
Voltage	230 V 50/60 Hz
Power	16 A (appr.)
Melting power	2,6 kW 100 kHz
Water supply	2 l./Min. (approx.)

(L) 700 x (W) 670 x (H) 700 mm 72,000 kg

(L) 740 x (W) 680 x (H) 520 mm 16,100 kg

## Mestra G3 casting machine Ref. 040000

The arm of the MESTRA G3 casting machine is articulated. This facilitates the casting of highly-melted materials by adding rotary speed to initial speed. The counterweight can be displaced gradually according to the weight and size of the cylinder. Being height-adjustable, the casting ring holder can accommodate any MESTRA casting ring within its crucible mouth.

### SPECIFICATIONS

Height	260 mm
Width	205 mm

## SM-2 Cen motor casting machine (stainless steel) Ref. 040064

The SM-2 CEN-MOTOR is a new generation unit based on the existing SM-1. It features a robust, compact, high-rigidity chassis with a "floating cabin" system which substantially reduces vibration during the operation. The electronic control uses a microprocessor to regulate the starting motor torque and the casting time simply and accurately. The main features of the arm are its extraordinary lightness, its automatic return system to prevent losses on unexpected start-ups, and its capability to handle casting rings of up to 100 mm in diameter.

When the machine is working, the cabin door is blocked by a safety lock to prevent accidents.

**Inox**

## Cabinet for casting machine Ref. 040065

Completely made in stainless steel with three 20 cm separated shelves.

DIMENSIONS

## Pre-heating furnaces

HP25 Ref. 080142  
 HP50 Ref. 080144  
 HP100 Ref. 080148

Extremely high performance pre-heating furnace family, composed of three models with different muffle capacity (2.5, 5 and 10 litres).

Made of stainless steel, the most convenient material for the extraordinary thermic requirements this kind of devices has to bear. The high quality of the muffle ensures an exceptionally long working life, even when continuously working at temperatures near 1100 °C.

When the thermocouple fails, the electronic control will announce it. This element is very economical and easy to replace by the user himself. On the other hand, the electronic control allows the programming of cycles composed of multiple parameters; you can define ramps and plateaus with temperatures, maintenance times, heating in a determined time or in degrees per minute. The memory can store up to twenty different programmes. The furnace is factory supplied with a ceramic tray.

## Pre-heating furnaces Vulcano

HP25 Ref. 080133  
 HP50 Ref. 080135  
 HP100 Ref. 080139

The Vulcano family of furnaces has been developed as an economical alternative to MESTRA's standard ovens. The only difference between a Vulcano oven and its equivalent in the standard range is in the electronic control, keeping the rest of the components and functions. Its LCD screen provides all the information necessary for programming and job monitoring.

The Vulcano benefits and characteristics perfectly fit the needs and expectations of most users at a very attractive price. The Vulcano line is available for all sizes of MESTRA furnaces.

## 50D Pre-heating furnace Ref. 080130

It is perfect for those works that do not require a classical programming cycle of ramps and plateaus.

Just select the set point temperature, and the furnace will start heating directly until this temperature is reached. Then, this temperature will be kept for a time programmed by the user.

Its digital controls ensure an amazing temperature accuracy and prevent the effects of thermal inertia. Besides, it features a connection for an external catalytic converter, and this element will operate from the beginning of the cycle up to the stopping temperature programmed by the user.

## Smoke catalytic converter for furnaces Ref. 080124

Simple device attached to the smoke vent of any pre-heat furnace to remove gases and combustion residues that are generated in the furnace as a result of the combustion of waxes and other materials.

Height	380 mm
Width	185 mm
Weight	5.3 kg
Power	600 W
Fuse	4 A

(L) 520 x (W) 300 x (H) 360 mm 6 kg

## Furnace for ceramics Ref. 100249

● Vacuum pump included

Renewed version of the well-known **MESTRA** porcelain oven. Fully automatic, compatible with the different types of porcelain in the market. It includes a high-vacuum pump. It features a wide display with complete information about the process given by the programme. It can store multiple programmes and modify parameters such as temperature and drying time, heating speed, maximum temperature, maintenance and cooling time, vacuum times and levels, etc.

All these parameters allow defining the ideal cycle for each material and obtaining a perfect result. The temperature can be calibrated in order to improve the accuracy. The furnace has different alarms to warn about any anomaly (breakage of thermocouple or resistor, failure in the vacuum-system, etc.)

The furnace is factory supplied with the following accessories:

- 1 vacuum pump
- 1 heating platform
- 1 calibration kit
- 1 tray

### SPECIFICATIONS

Height	426 mm

## Casting ring cleaner/Wax remover Ref. 080068

Ref. 080068

6 Casting rings 3x

### ¡Safe wax!

Wax is recovered thanks to the lower tray, so it can be reused.

Practical device designed to remove the wax from the casting rings before inserting them into the pre-heating furnace. This simple and quick operation prevents the fumes and bad odours produced by the wax when burning inside the furnace. Its operation is simple: just fill the tank with water up to the tray and place the casting rings inside. A powerful resistor will heat the water up in a few minutes until the wax is melted by the action of the steam. The working temperature can be regulated at will by means of a thermostat. Besides, the machine can be used for other operations that require a tank full of warm water at a given temperature, for instance thermal-polymerization of small elements. The machine is made completely of stainless steel, material which ensures a quick cleaning and a superb resistance to corrosion.

A basket for the casting rings and a stainless steel lid are included.

### SPECIFICATIONS

Height	245 mm
Width	400 mm
Depth	230 mm
Weight	5 kg
Voltage	230 V, 50/60 Hz
Power	750 W

 (L) 520 x (W) 300 x (H) 360 mm  6,000 kg

## Microwave oven for zirconium Ref. 080114

Microwave sintering furnace for zirconium prostheses.

### Advantages:

- Minimum total sintering time of only 4 hours.
- The temperature is reached more uniformly, resulting in a stronger sintered structure.
- Maintenance savings (less power, fewer components, without the fragile and expensive resistances of molybdenum silicate).
- Very low consumption (800/1100 W).
- Allows several production cycles on the same day.
- Very easy to operate.
- Much smaller than conventional ovens.
- The housing practically does not get hot.

The oven is supplied with all necessary accessories for immediate start-up.

### ADVANTAGES OF MICROWAVE SINTERING

**BREAKAGES ARE AVOIDED**

**TIME SAVING**

**ENERGY SAVING**

**SAVINGS ON MAINTENANCE**

**RETRENCH OF SPACE**

**INTUITIVE OPERATION**

**GREATER PRODUCTION CAPACITY**

**QUALITY IMPROVEMENT**

## Pneumatic chisel Ref. 050550

Essential tool for a quick cleaning off of models. It has air flow regulation; ergonomic shape; made in corrosion-free materials; small size. It has been designed to reduce vibrations and sound level to a minimum level. Three chisel heads with different sizes and shapes are included. There is also a Filter Regulator and Oiler Attachment Kit and a Starting Pedal. The air connection hose is Ø 6 mm.

## Pneumatic chisel starting pedal

Ref. 050552

## Vacuum forming machine Ref. 080542

It is cheap, easy to use and has an attractive design. It has a powerful aspiration motor with automatic connection when the sheet holder goes down. The carbon heater allows a progressive and uniform heating of the material that is going to be formed. It can be used with square sheets. The machine is supplied with a plane model holder and with a basket that can be filled with grit (a can is included with the machine) so forming depth is reduced.

Sheets  $\square$  from 120 to 131 mm  
Sheets  $\circ$  from 125 to 134 mm

(L) 300 x (W) 270 x (H) 430 mm 6 kg

Height	310 mm
Width	275 mm
Depth	260 mm
Weight	4.6 kg
Power	925 W

Standard square thermoforming sheets of 127 x 127 mm.

Made of high quality plastic with FDA approval and CE marking certifications.

There is no soot, nor fumes during the heating. As they do not contain recycled materials, they do not tear while subjected to vacuum.

They are available in a wide range of thickness and types.

## Pressure former PlastPress

Ref. 080544

The most compact positive pressure machine on the market. Greater accuracy in the forming process and lower noise compared to vacuum machines.

Practical and versatile, it accepts round and square sheets up to 6 mm thickness. It must be connected directly to a compressor (between 3 and 8 bar).

Sheets  $\square$  from 120 to 131 mm  
Sheets  $\circ$  from 125 to 134 mm

(L) 310 x (W) 270 x (H) 310 mm 8.5 kg

Height	270 mm
Width	235 mm
Depth	265 mm
Weight	7.5 kg
Power	450 W

## Thermoforming sheets

Standard square and round thermoforming sheets. Made of high quality plastic with CE marking certification as medical device. There is no soot, nor fumes during the heating. As they do not contain recycled materials, they do not tear while subjected to vacuum. They are available in a wide range of thickness and types. Sold in metallic packaging with vacuum closure.

## Pressure former

Ref. 080543

The strong pressurization allows precise molding, regardless of the cut of the model, as well as various thicknesses (0.5 to 4.0 mm).

Square and round sheets (127, 125, 120 mm) can be used.

Height	545 mm
Width	410 mm
Depth	260 mm
Weight	15 kg
Power	450 W
Pressure	4-6 bar

## Dental polyamide injector

Ref. 080560

Dental polyamide injecting machine of compact design. It can inject 7/8" (22.5 mm) cartridges, but there is a version that injects 1" cartridges, available upon request. The electronic controls allow operating in automatic and manual modes, and thoroughly adjust the injection temperature, so achieving perfect results. It features a pneumatic system to cool down the piston in order to shorten the cycles. The thorough adjustment between piston and casing prevents seizing up in case of breaking the cartridge. The MESTRA polyamide injector can be used in different positions (hanging on the wall, lying standing on the table), taking minimum space. Factory supplied with two aluminium flasks and a demolding spray.

Supplied with two flasks Ref. 020210

Power	1100 W
Pressure	6/8 bars

(L) 950 x (W) 600 x (H) 500 mm 43 kg

**Inox**

## Aneto II gel mixer

Ref. 080512

Attractive and reliable gel mixer featuring state-of-the-art technology: tank heating by lateral and bottom resistors, which prevents gel from burning due to too high temperatures; belt driven system which allows an extremely smooth and silent operation; oxide free casing, made of stainless steel and polyurethane; high capacity (7 litre tank); state of the art electronic controls allowing multiple adjustments...

A complete machine designed to work without problems for many years.

Height	465 mm	Voltage	230 V 50-60 Hz
Width	330 mm	Power	650 W
Depth	385 mm	Speed	100 rpm
Weight	14 kg	Capacity	7 l

(L) 510 x (W) 480 x (H) 660 mm 18 kg

**Inox**

## Gel Bat 6 gel mixer

Ref. 080510

The MESTRA gelatine mixer is made of stainless steel. The control microprocessor offers the user a wide range of options, such as pre-programming gelatine temperature for a given time.

Also we can change from pouring temperature C1 (75°C - 95°C) to maintenance temperature C2 (35°C - 65°C), or viceversa, simply by pressing the button. The torque of the motor is high, so it can be easily started even if the tank is full (the gelatine cut into pieces).

It has all safety features required by the CE mark, including:

- Motor thermal relay
- Overheating probe
- Door micro
- Main fuse

Height	500 mm	Voltage	230 V 50-60 Hz
Width	320 mm	Power	700 W
Depth	320 mm	Speed	70 rpm (50 Hz) - 84 rpm (60 Hz)
Weight	15 kg	Capacidad	6 l

(L) 600 x (W) 420 x (H) 440 mm 18 kg

**NEW**

## Drying oven Ref. 080118

for thermoforming sheets

A fan circulates the hot air producing a uniform drying.

- Draws out moisture and keeps dry thermoforming sheets, to avoid the formation of pores.
- Instrument drying.
- Drying of plaster models, etc.
- 6 stainless steel trays.
- Stainless steel housing.
- 24 hour timer.

Height	310 mm
Width	340 mm
Depth	450 mm
Weight	8.3 kg
Power	550-650 W
Temperatura	35-75°C

## Spot welding machine

Ref. 100127

Its small size means it can be installed anywhere. It has a full set of exchangeable electrodes, making it easy to find the best way to adapt to the job in question. The machine is controlled electronically, which practically eliminates sparks between electrodes on machines without a control system of this type. Power can be selected from among 30 different levels to adapt to the thickness of the material to be welded. The machine is supplied with an accessory for the heating up of wire arcs, and two flexible cables to perform manual welds.

Height	160 mm
Width	220 mm
Depth	335 mm
Weight	5.5 kg
Power	600 W
Earthing plug	

(L) 470 x (W) 300 x (H) 160 mm 7.5 kg

## Planetarium Plus IV Sandblaster

(with heater) Ref. 080246

### Ref. 080242-50

Easy to place self-adhesive Protective Cover. It prevents glass from wearing out due to sand abrasion. Packs of 10 units.

- Ø 1,25 mm
- Ø 1 mm +
- Ø 1 mm
- Ø 0,75 mm

Heating element

Operating pressure	2 a 6 bars
Max. air Consumption	80 l /min
Voltage	230 V 50-60 Hz
Consumption	115 W

(L) 740 x (W) 520 x (H) 550 mm 32,000 kg

## Galaxy Sandblaster

Ref. 080235

Sandblaster totally made in stainless steel. It has a removing spinning basket for the automatic skeletons blasting, and a 3 mm. diameter static nozzle.

In the automatic performance mode, the basket spins and the nozzle blows for a time —set by the user— between one up to 30 minutes. Also it is possible to blast in a mode just pressing a button. The sand tank is over dimensioned to load a big quantity of sand, enlarging this way the automatic cycle time. The wide window allows a great vision of the cabinet inside. The glass is protected against abrasion by a plastic coat. The machine is supplied with a Boron Carbide nozzle (C4B) a material with more much abrasion resistance than the traditional tungsten; and with two plastic foils to protect the glass.

### Ref. 080235-50

Easy to place self-adhesive Protective Cover. It prevents glass from wearing out due to sand abrasion. Packs of 10 units.

Operating pressure	2 a 5 bars
Maximum air consumption	90 l. /min. a 5 b.
Voltage	230 V 50-60 Hz
Consumption	15 W

(L) 700 x (W) 540 x (H) 730 mm 28,000 kg

## Cosmos Sandblaster

Ref. 080233

Based on the popular MESTRA's Galaxy model, the COSMOS sandblaster includes two micro-blasting nozzles similar to those used in the Constellation model, becoming a unique and powerful device with a Ø 3 mm fixed nozzle and micro-blasting tools. You save the space and money required to buy two different devices separately. It is completely made of stainless steel. Factory supplied with a Ø 3 mm boron carbide fixed nozzle, two tank/nozzle sets and a set of glass-protection covers (Ref. 080235-50). Ergonomic pedal and blowing nozzle.

- Sand tanks included
- Boron carbyde NOZZLES of 3 mm.
- Mobile guns with 1 and 1,25 mm. NOZZLES

### Ref. 080235-50

Easy to place self-adhesive Protective Cover. It prevents glass from wearing out due to sand abrasion. Packs of 10 units.

Operating pressure	2 a 5 bars
Maximum air consumption	90 l. /min. a 5 b.
Voltage	230 V 50-60 Hz
Consumption	10 W

(L) 700 x (W) 540 x (H) 730 mm 28,500 kg

## Plutón Sandblaster *stainless steel*

2 Tanks Ref. 080253

Depth 235 mm

Height 290 mm

Weight 340 mm

- 2 Mobile guns
- 1 Pedal
- LED lamps

Ref. 080253-50

Easy to place self-adhesive Protective Cover. Packs of 10 units.

Operating pressure	2 a 5 bars
Maximum air consumption	80 l. /min.
Voltage	230 V 50-60 Hz
Consumption	20 W

(L) 490 x (W) 475 x (H) 490 mm 9,500 kg

## Constellation Practic Sandblaster *epoxy paint*

2 Tanks Ref. 080259

Ref. 080262-50

Easy to place self-adhesive Protective Cover. Packs of 10 units.

Operating pressure	2 a 5 bars
Maximum air consumption	80 l. /min.
Voltage	230 V 50-60 Hz
Consumption	20 W

(L) 700 x (W) 540 x (H) 730 mm 20,000 kg

Inox

## Constellation Sandblaster *stainless steel*

2 Tanks Ref. 080262 3 Tanks Ref. 080263  
4 Tanks Ref. 080264

The Constellation family comprises a range of modular sandblasters that are able to adapt to the needs of most professionals. Their models have 2, 3 and 4 sand tanks so this machine is a very versatile tool in the dental lab.

The main features of the "Constellation" Sandblasters are the following:

- Stainless Steel Chassis AISI 304 with a broad glass window.
- Blowing gun inside the cabinet, very useful when cleaning.
- Lighting system with fluorescent lamp.
- Modular system, so it can be extended in the future.
- Tank changing valve inside the cabinet.
- Relief valve that stops air flow when the pedal is released, so sand is saved.
- Ergonomic pedal connected to the machine by flexible tube.

- Ø 1,25 mm
- Ø 1 mm +
- Ø 1 mm
- Ø 0,75 mm

## Constellation Sandblaster *epoxy paint*

2 Tanks Ref. 200262 3 Tanks Ref. 200263  
4 Tanks Ref. 200264

Ref. 080262-50

Easy to place self-adhesive Protective Cover. It prevents glass from wearing out due to sand abrasion. Packs of 10 units.

Operating pressure	2 a 5 bars
Maximum air consumption	80 l. /min.
Voltage	230 V 50-60 Hz
Consumption	20 W

(L) 700 x (W) 540 x (H) 730 mm 23,000 kg

## Eclipse II Sandblaster Ref. 080220

Cabin entirely made of ABS of reduced dimensions maintaining the amplitude in the work area and with a substantial improvement in lighting. They have two mobile micro-blasting nozzles and, in the hopper version, a large sand tank and a 3 mm static gun.

The pneumatic components employed by the Eclipse sandblaster family have been chosen from the high-end industrial range. This guarantees a long, problem-free life, as long as all recommended maintenance procedures are carried out.

To work comfortably, it's essential to have optimal visibility. The Eclipse sandblasters offer complete vision through a large window. Almost 80% of the upper cover of the cabin is glass. The position of your hands and back is also very comfortable when it comes to choosing a good viewing angle.

## Eclipse II-T Sandblaster Ref. 080228

Same characteristics as Eclipse II, and with a large sand hopper and a 3 mm static gun.

### Ref. 080220-12

Easy to place self-adhesive Protective Cover. It prevents glass from wearing out due to sand abrasion. Packs of 10 units.

Ref.	080220	080228
Height	330 mm	490 mm
Width	360 mm	360 mm
Depth	450 mm	450 mm
Weight	5,7 kg	7,7 kg
Maximum air consumption	80 l/min	100 l/min
Operating pressure	2 a 5 bar	2 a 5 bar
LED inside light		

## Eclipse Automatic Sandblaster Ref. 080218

Made entirely of technical plastic, a highly resistant material, easy to clean and without oxidation. It allows to place it in any corner of the laboratory.

The basket can be easily uncoupled from the drive shaft, which simplifies the preparation of the works.

The skeletons are deposited in a basket that rotates by the action of a motor.

The blowing nozzle is adjustable in the three dimensions of space.

Hopper capacity up to 8 kg of sand.

Height	430 mm
Width	320 mm
Depth	310 mm
Weight	5.5 kg
Maximum air consumption	90 l/min.
Operating pressure	2 a 5 bar.
LED inside light	

## Terra Sandblaster

**Terra I** Ref. 080292  
**Terra II** Ref. 080294  
**Terra III** Ref. 080296

Similar features to those of the T1-T2-T3 well known models, but with a major difference: TERRA sandblasters have a bigger chamber and a LED lighting. Besides, the position of the holes to insert the hands has been modified to allow a more ergonomic operation. The name of the three models is still similar:

- TERRA I** It features just a fixed nozzle
- TERRA II** It features a fixed nozzle and a tank for micro-blasting
- TERRA III** It features a fixed nozzle and two tanks for micro-blasting.

**Ref. 080270-50**

Easy to place self-adhesive protective cover. It prevents glass from wearing out due to sand abrasion. Packs of 10 units.

Operating pressure	2 a 5 bars
Maximum air consumption	100 L /min.
Voltage	230 V 50-60 Hz
Consumption	LED 6 W

(L) 490 x (W) 460 x (H) 480 mm 12,000 kg

## T1, T2, T3 Sandblaster

**Ref. 080270 = T-1**  
**Ref. 080280 = T-2**  
**Ref. 080290 = T-3**

This is a compact and economical family of Sandblasters. All of them are equipped with a fixed nozzle of 3 mm diameter with sand re-flow system. The T2 model also has a 1,25 mm mobile nozzle. The T3 model has two mobile nozzles of 1 and 1,25 mm. Switching between tanks is made thanks to a pneumatic valve. All models have interior LED lighting. Dimensions, appearance and finish are similar.

## Sandblaster (no fixed nozzle)

**Ref. 080269 = T-1**  
**Ref. 080279 = T-2**

**Ref. 080270-50**

Easy to place self-adhesive protective cover. It prevents glass from wearing out due to sand abrasion. Packs of 10 units

Operating pressure	2 to 5 bar
Maximum air consumption	100 L /min.
Voltage	230 V 50-60 Hz
Consumption	LED 6 W

(L) 490 x (W) 460 x (H) 480 mm 10,500 kg

## Microblasting module (pressure reducer and pedal)

**Ref. 080251**

It is supplied with A 1,25 mm nozzle (0,75 mm or 1 mm optional). The machine also has a pressure reducer, operation pedal and pressure gauge, so it is precise and safe to use. The support is made in stainless steel sheet.

(L) 430 x (W) 270 x (H) 270 mm 3,000 kg

## Microblasting unit

(Lab) **Ref. 100122**

Oxide	50 / 100 micras
Pressure	4 a 5,5 kgf/cm <sup>2</sup>

## Aluminium oxide (4 kilos)

Product of the highest purity (more than 99 %) and excellent grain with marked sharp edges for perfect abrasion. It is sold in 4 kg cans with particle sizes of 50, 100, 150 and 250 microns. Moisture free. Essential in any dental laboratory to remove plaster remains and abrasion from all types of materials.

## Glass microsphere (3 kilos)

Very high quality product. The spheres have great uniformity in size and resistance to impact, avoiding breakage. Unlike the sharp edges of aluminum oxide, the blunt surface of the microspheres causes the ridges of the material to be treated to be crushed. The result is a shiny and smooth surface with a soft touch. Ideal for the treatment of dental metals and alloys. It is sold in 3.3 kg cans.

50 µm  
Ref. 080312

## Microchamber

for automatic sandblasting of metallic structures

Ref. 050585

(L) 49 x Ø 33 mm 0,01 kg

Three replacement upper caps for sandblasting microchamber

Ref. 050586-01

## Work box Ref. 060210

- Made of transparent injected plastic.
- Prevents losses of precious metal powder.
- Prevents eye accidents due to flying particles, and considerably reduces inhalation of harmful dust.

## Pressure air nozzle

Ref. 050220 (for Ø 8)

Ref. 050220 (L) 122 x Ø 25 mm 0,08 kg

Ref. 050221 (for Ø 6)

Ref. 050221 (L) 105 x Ø 25 mm 0,08 kg

Ref. 050222 (L) 125 x Ø 25 mm 0,09 kg

Ref. 060210 (L) 520 x (W) 300 x (H) 355 mm 3 kg

## Work box **Orión** Ref. 080214

Seldom has a product aimed at dental professionals been built with such suitable dimensions as the Orión dust extraction box. Its size is small enough to fit any spot, yet wide enough to be able to work without restrictions.

### Common elements in the 2 models:

- High luminosity LED lamp.
- Absence of shadows inside.
- Ergonomic work position.
- Optimal absorption of powder by means of external suction (not included).
- Easy cleaning.

Docking coupling with Jeb type suction.

The suction hood is strategically located so that it doesn't obstruct. The hood is connected to an external suction tube at the rear through a pivotable outlet. Furthermore, detachable boxes collect the dust that could fall through the hand rests.

Height	300 mm	Length	330 mm
Width	360 mm	Weight	2.6 kg

	(L) 490 x (W) 460 x (H) 480 mm
	5.3 kg

- 1) Remove elbow tube (rear outlet)
- 2) Shipyard tube placement.

## Finishing box **Eclipse** Ref. 080216

Similar in dimensions, purpose and appearance to the MESTRA Orion (Ref. 080214), but with a more closed design. MESTRA Orion (Ref. 080214), but with the peculiarity that its design is more closed. Particularly recommended for those tasks where a greater amount of dust and/or gases may be generated. Ergonomics, lighting and practicality are maintained with respect to the Orion model.

Height	275 mm	Length	330 mm
Width	360 mm	Weight	2.8 kg

	(L) 480 x (W) 370 x (H) 320 mm		3.8 kg
--	--------------------------------	--	--------

## Finishing box **Eclipse** with built-in suction Ref. 080217

This box has similar features to the "Eclipse revision booth" (Ref. 080216), but with the particularity of integrating its own suction unit. Its small dimensions make it ideal in places with little space, where it is important to keep the environment clean without the need for bulky suction equipment. If necessary, the machine can be connected to an external extraction source.

Front

Back

Height	275 mm	Length	400 mm
Width	360 mm	Weight	2,8 kg

	(L) 410 x (W) 370 x (H) 370 mm		3,800 kg
--	--------------------------------	--	----------

## Polisher with suction Ref. 080500

The MESTRA polishing box is a compact, functional machine made entirely in stainless steel. It has two rubber screens in the polishing area to collect heavy particles. It is equipped with lighting LED and suction. It meets the most stringent regulations regarding safety and environment:

- General protection by means of fuses.
- Safeguard against unwanted start-ups in the absence of electrical power by means of a safety switch with manual reset.
- Silent self-contained suction unit (67 dB) with collection of particles by filter.
- Lighting by means of two antifatigue lamps.

### SPECIFICATIONS

Voltage	230 V 50/60 Hz
Power (appr.)	800 W
Speed rpm	1500/3000 50 Hz 1800/3600 60 Hz
Suction power	500 m <sup>3</sup> /h

(L) 950 x (W) 600 x (H) 680 mm **61 kg**

## Box with suction for polishing Ref. 080502

This box with suction for polishing gives excellent value for money, and provides an economical way to adapt laboratory polishers to safety standards. It features a suction and filter unit, lighting system, polycarbonate protective screens and a Schuko type power connection with a manual safety reset to prevent unexpected start-ups (EC standards). The body is made of high-strength polypropylene, combined with a steel chassis to form a highly robust unit. This also eliminates the corrosion problems to which machines of this type are prone. The body can also be used with all models of polisher, though it is intended principally for use with MESTRA™ models. Its ergonomic design makes polishing and changing the filter simple and comfortable. The machine is supplied with two rubber screens. As an option, it can be supplied with Ref. 080150, Ref. 080160 or Ref. 080162 polishers screwed to its base.

### SPECIFICATIONS

Voltage	230 V 50-60 Hz
Power (appr.)	300 W
Suction power	500 m <sup>3</sup> h.

(L) 950 x (W) 600 x (H) 680 mm **45 kg**

## Polisher with suction (centralized) Ref. 080501

Similar characteristics to those of the Polisher Box with Aspiration Ref. 080500 but without aspiration motor nor filtering system, so it is necessary to connect it to an external equipment of centralized aspiration. This machine is supplied with two inlets for tubes of Ø 40 mm. at the rear

## Box with suction for polishing (centralized) Ref. 080504

Similar characteristics to those of the Box with suction for polishing but without suction motor nor filtering system, so it is necessary to connect it to an external equipment of centralized suction. This machine is supplied with two inlets for tubes of Ø 40 mm. at the rear.

## Polishing Mini Box Gorbea Ref. 080508

Its dimensions allow it to be located in any corner. Through this accessory, the R-080164 mini polisher becomes a complete polishing box with professional features.

- The set includes the set polisher and box.
- High torque motor
  - Variable speed up to 5000 rpm.
  - Connection to external suction.
  - LED lighting.
  - Protection screens.
  - Safety switch against sudden start.
  - Excellent stability.

• Brushes not included.

For polishing and grinding metals, etc. by using dry or wet methods.  
POWER: 500 W, 2-speed, maintenance-free motors.  
QUIET: low noise level (48 dB), vibration-free.  
LEAK-TIGHT: sealed shafts to prevent water and pumice getting in.  
SAFE: safety switch to prevent accidental start-ups after power failures, thus removing any risk of Injury.  
ERGONOMICS: built to allow free arm movement and comfortable work in standing or sitting position.  
Lever type extractors to make brush-holder removal easier.  
Its robust and heavy construction (12 kg) and its wide base on non-slip rubber feet guarantee maximum stability.

Power	500 W
R.P.M.	1.500 / 3.000
Voltage	230 V 50-60 Hz

Optional

The MESTRA polishing lathe has a modern and elegant design. It is made according to the most modern concepts ensuring high quality and safety. The motor housing is made of extruded aluminium tube (special section). Outside diameter is 125 mm. Its conic ends allow perfect sight of working area. Large base resting on 4 suction pads for greater stability.

Power	125 W

## Electrolytic polisher Ref. 080490

The MESTRA electrolytic polisher is designed specially for dental laboratories. Stainless steel construction and large tray capacity. Up to three skeletons can be polished simultaneously. Equipped with a timer, it allows polishing to be programmed from 0 or 30'.

It includes a potentiometer, an ammeter, a thermal safety system, and a visual function indicator. A highly efficient unit of sober design.

**Inox**

### SPECIFICATIONS

Voltage	230 V 50/60 Hz
Secondary voltage	16 V
Maximum current	10 V
Circuit breaker	10 V
Timer	0-30 Min.
Tank capacity	2 litros
Tank diameter + height	Ø 160 mm x 150 mm alto
Tank weight	1,2 kg

(L) 520 x (W) 300 x (H) 355 mm	7,500 kg
--------------------------------	----------

## Electrolytic polisher

Ref. 100293

Solidly made and small. Smooth and even surface and dismountable tank, which makes cleaning very easy.

The electronic controls allow adjusting thoroughly the time and the maximum current. Besides, it can store two different polishing programmes in the memory.

Height	145 mm
Width	210 mm
Depth	250 mm
Weight	1,9 kg
Voltage	100-240 V
Power	100 W

(L) 250 x (W) 220 x (H) 150 mm	3,310 kg
--------------------------------	----------

\*With system agitation by air

## Solution for electrolytic bath (1 and 5 litres)

Ready for use.

Suitable for any electrolytic polishing device.

High quality product. It has been formulated to minimize its toxicity, when the safety measures and recommendations for use are followed.

Using it together with electrolytic baths of the type dental and/or jewelry, the quality achieved is excellent. In addition, it remains without degrading for many cycles of use.

Its viscous texture prevents splashing and makes it much easier to clean up accidentally spilled debris.

**NEW**

Ref. 130351

Ref. 130350

## Altamira steam cleaning box Ref. 080600

Nobody questions the need and importance of steam jet cleaning in the Dental Lab. Nobody questions its consequences either: dirt in sinks, air moisture, condensation in walls and floors... And all this leaving aside the high price these devices used to have up to now. In MESTRA® we have worked hard to make these troubles simply disappear by using the Altamira Steam Cleaning Cabin, the indispensable complement for any steam cleaning device.

## Box spray application

Fuse	2 A	

(L) 620 x (W) 530 x (H) 630 mm	27,000 kg	23,500 kg
--------------------------------	-----------	-----------

This Altamira chamber has been specially adapted for shading spray application on models prior to scanning. Also useful to clean the dust on the zirconia milling discs. The set requires an external suction unit not included.

## Steam machine

Ref. 100193

Reliable, safe and resistant. Tank capacity of 3 litres and working pressure of 3 bar. The tank is completely made of high-quality stainless steel. The powerful heater means that working pressure can be reached in just a few minutes.

The level of water in the tank can always be checked through a peephole. To avoid calcification in the boiler and extend the working life of the device, the machine must be filled with decalcified water, or preferably distilled water.

Capacity	3 l.
Voltage	220 V 50/60 Hz
Power	1300 W
Pressure	3 bar
Height x Width (with pistol support)	640 x 250 mm

 (L) 430 x (W) 310 x (H) 430 mm	 12 kg
--------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------

## Steam machines

Moderate use

**NEW**

Ref. 100195

**NEW**

Ref. 100196

Due to their abundant flow of dry steam, they are ideal for cleaning tasks in dental laboratories. Both devices are supplied with a water level meter and a practical funnel.

	Ref. 100195	Ref. 100196
Height	250 mm no support 685 mm with folded support	240 mm no support 680 mm with folded support
Width	235 mm	400 mm

## For Zirconia

## Polishing discs and burs for zirconia

We present two kits of diamond discs and burs, specially designed for pre-polishing and high-gloss polishing of zirconia inlays and veneers, without the need for glazing, polishing paste or water cooling.

They are autoclavable at 135°C (but not their presentation box), their shanks have a standard diameter of 2.35 mm and a recommended working speed of between 10000 and 15000 rpm, 20000 maximum for diamond rubber and 25000 maximum for diamond ceramic.

### 2-STEP KIT Ref. 108106

*Pre-polishing and fine polishing*

**Ref. 108106-12**  
Diamond rubber  
Coarse grain • Pre-polishing

## Sirocco suction units

It is difficult to find a manufacturer in the dental sector that offers such a wide range of professional suction units as the Sirocco family, covering any possible need that may arise with the most suitable model for each case.

In addition, the modular and scalable nature of this range provides solutions for both clinical and laboratory use, allowing the user to choose from a multitude of options, such as unit size, arm type, filtering system, etc.

Although the number of alternatives and accessories is enormous, all units follow the same script: they are extremely quiet, aesthetically appealing suction units incorporating powerful induction motors (with a longer life than traditional models) and very economical consumables, with the level of quality that MESTRA guarantees in all of its products.

Induction motor (brushless)

Efficient low-noise suction (55 dB)

Strong suction power

Easy removal and cleaning of the reusable filters

## Sirocco S Ref. 080534

Suction especially suitable for clinical and laboratory environments, it is the perfect size for desktop use and has a sleek aesthetic.

The Sirocco S model incorporates two stages of filtration: a first circular HEPA (High Efficiency Particulate Array) filter and a second internal HEPA filter. Thanks to its efficient design, the filter change operation is extremely simple.

The unit also features an external micromotor detection system and seven different power levels.

- Powerful induction motor
- Intuitive "touch" keypad
- Easy to use and change filter
- Exceptionally quiet

### SIROCCO S TECHNICAL CHARACTERISTICS

Height	135 mm	Weight	3.1 kg
Width	280 mm	Power	350 W
Depth	280 mm	Noise	55 dB

Ref. 080534AT

Basic configuration of the Sirocco Model S table-top suction unit, supplied with a flexible and extendable hose up to 700 mm for directing the suction to the work area. It allows small and delicate polishing and reworking operations.

- Easy to orient the suction hood
- Built-in LED lighting

Tube 700 mm • Ø 45 mm • Weight 3.8 kg

542 mm  
336 mm  
500 mm  
4.9 kg

- Spacious and robust design
- Large screen and access
- LED lamp for perfect illumination
- Great working ergonomics
- Comfortable and practical armrests

Sirocco S suction unit and a dental laboratory finishing box that is fully compatible with the benchtop unit, forming a very compact and balanced unit.

- Spacious and robust design
- LED lamp for perfect illumination
- Comfortable and practical armrests

Height 365 mm • Width 345 mm  
Depth 400 mm • Weight 5.5 kg

Finishing box that is fully compatible with the Sirocco M and L suction units with which it forms an extremely useful and reliable tandem for a clinic and laboratory environment, allowing small polishing and refinishing operations.

Ref. 080534AL

## Sirocco M & L Ref. 080536 - Ref. 080537

These are two robust, quiet and highly reliable suction units, the M model being particularly practical for use under the workbench and the larger capacity L model very useful in CAD/CAM suction systems.

Its brushless motor extends its service life by five to ten times compared to traditional models.

They incorporate a connection for an external micromotor and a milling machine that will operate synchronously with the suction unit. In addition, its ergonomic design with handles and wheels facilitates its use and mobility in the clinic and laboratory.

Depending on requirements, you can choose to use disposable bag filters or reusable HEPA filters, or even a ULPA filter, as well as three different arm types; flexible hose for connection to other devices, swivelling snake arm or articulated arm, which are also equipped with different suction hoods.

- Extensive set of fully compatible accessories
- Exceptionally quiet operation
- Easy to use and change filter

Sirocco M with flexible hose

## Eolo Induction aspiration unit

Ref. 080533

Its new "brushless" induction motor extends its useful life between 5 and 10 times compared to traditional models, and has an innovative double filter system optimized for work in the dental laboratory (including abrasives such as aluminum oxide). It can be mounted with HEPA filter.

It easily adapts to the laboratory furniture, filling a minimum space. In addition, the ergonomic design facilitates its use and mobility. The electronic control with LCD screen is equipped with protection systems against overloads or obstructions in the suction mouth and with a visual indicator of the filter filling level and the detection of the micromotors.

It allows manual or automatic operation synchronized with up to 3 different devices (sandblasters, micromotors, etc.). The detection and adjustment of micromotors is carried out by the electronic control itself, which allows detecting any micromotor, including those of the "brushless" type.

Height	585 mm
Width	210 mm
Depth	500 mm
Weight	17 kg
Power	750 W
Noise	65 dB

 (L) 550 x (W) 320 x (H) 620 mm  20 kg

High performance microprocessor. It allows the simultaneous operation of two handpieces to be synchronised with the suction. In addition, it has other features such as obstruction detection, switch-off delay time, power control, etc.

## Ciclón dust decanter Ref. 080535

It is a simple device to be connected to the inlet pipe of a conventional Aspiration Unit for pre-filtering dust particles. The air circulates along a circuit that makes the dust particles fall into an inner tank. More than 99% of the aspirated dust and dirt is removed, reducing the risk of obstruction of the aspiration pipes and making the working life of the aspiration filters considerably longer.

The dust tank is easily accessible and, therefore, cleaning the device is a comfortable and simple task. The device features anchoring elements especially adapted to EOLO aspirations, with which it makes up a high performance compact unit.

- CÍCLÓN is built in high resistance polypropylene.

For use in locations with reduced space.

## Dry piston compressors

- 80 l/min compressor Ref. 110300
- 80 l/min compressor with dryer Ref. 110310
- 160 l/min compressor Ref. 110330
- 160 l/min compressor with dryer Ref. 110340

Family of four compressors consisting of two sizes of 80 and 160 litres/minute to which a dryer with automatic drain can be coupled.

Extremely quiet operation (60 dB), easy maintenance (dry piston) and excellent reliability. They are supplied with two pressure gauges (boiler and service pressure), outlet pressure regulator and complete set of valves for draining.

The service pressure can reach 8 bars.

Ref. 110300

Ref. 110310

Directive 2014/29/UE (pressure vessels)

### How do I know if my compressor complies with the European safety regulations?

It is easy to find dental compressors made in the East that do not comply with current European safety regulations. For this reason, it is advisable to check its features and security stamp: it is a plate welded to the tank similar to the attached picture. Next to the CE mark, you can see the number of the Notified Body that has validated its adaptation to European standards.

- The models with dryer are also available with HEPA filter (H14) Ref. 110310H and Ref. 110340H.

- The activated carbon filter Ref. 110300-53 is available as an accessory for all compressors.

## Air purifiers

Family of air purifiers of three different sizes. They act on the stale air in any room, eliminating dust, dirt and germs. After the treatment, the air is much cleaner and more breathable. It should be emphasized that poor air quality favors the appearance of diseases, especially of a respiratory type.

The purification process begins with a battery of filters of three different levels: bacterial HEPA, activated carbon and photocatalytic. Subsequently, a high-performance UV lamp continues the cleaning work.

\* **Purification is completed with ionization and the possibility of activating an ozone generator.** After the treatment, we can speak of a highly purified and quality air. There are three different sizes depending on the volume of the room to be treated.

**Purifier 25 m<sup>2</sup>**

## UV cabinets

Family of UV sanitizers of three different sizes.

The effectiveness of ultra violet rays is known to eliminate germs from any surface.

In the field of hygiene, they are widely used in different sectors: the elements to be sanitized are introduced into the chamber where they will be subjected to UV light for a defined time.

After the process, a good part of the microorganisms present will have disappeared.

- **Ref. 100500:** Ideal for small objects such as mobile phones, masks, key rings, coins, jewelry, etc. Highly recommended for personal use. With drying function through heating resistance.

- **Ref. 100502:** Medium-sized. Its camera allows to process the same type of articles as the previous model, but in greater quantity; or if you prefer, larger objects. Ideal for clinics and laboratories.

- **Ref. 100504:** The interior of the cabinet is made entirely of easy-to-clean stainless steel. Contains 10 levels of trays in which instruments can be stored. The deposited elements will be subjected to the action of UV rays.

### SPECIFICATIONS

## Purifier / Nebulizer Ref. 100520

High efficiency purifier-nebulizer device, capable of atomizing the disinfectant solution creating a very fine mist that penetrates every corner.

- The droplet size can be adjusted, as well as the jet launch distance.
- Using the appropriate products, it is possible to efficiently disinfect large surfaces in just a few minutes (up to 100 m<sup>2</sup> in just 10 minutes).
- Its 5 l tank. allows spraying many square meters on a single charge.
- The reduced weight of the nebulizer - about 3 kg -, together with the practical banner tape that is included, allows a comfortable, efficient and safe use.
- The device is essential to disinfect medium-sized surfaces.

### SPECIFICATIONS

Height	250 mm
Length	570 mm

Effective range	Adjustable: 3-8 m

## Calypso ultrasonic cleaner

Ref. 080422

The "Calypso" model is a last generation Ultrasonic Cleaner that includes the latest innovations: Sandwich type transducers, with 100 W real power transmitted to the tank; working frequency of 40 KHz., representing an optimum compromise between sonority and cleaning power; electronic time control run by a microprocessor, with digital display and warning acoustic signals; automatic heating system of the cleaning liquid; high density polyurethane body, a material resistant to chemical agents; tank of 4 litre capacity and waste pipe; etc. All these characteristics are complemented by an attractive line of careful design. The machine is supplied with the following accessories:

- A stainless steel basket for equipment cleaning.
- A glass for cleaning of little instruments and its support.
- A lid that eliminates the noise while working and prevents dirt coming into the cleaner.
- Ref. cleaner tweezers (MESTRA Ref. 070520).

Ref. 080422-26 Optional Long basket (not included)

## Ultrasonic bath 2.5 L. Ref. 100140

Very comfortable and practical for cleaning small objects in the Dental Laboratory and Clinic. 2.5-litre capacity tank. It has a heating system and an electronic timer. The equipment is supplied with a protective plastic tray.

Voltage	220-240 V 50/60 Hz
Power	80 W
Capacity	2500 ml
Frequency	35 kHz

(L) 360 x (W) 275 x (H) 240 mm 3,500 kg

## Ultrasonic bath, 3 L. Ref. 100142

For cleaning small objects in the laboratory and dental practice. With detachable cable, drain valve and hose. Includes plastic protective basket and drain hose.

Voltage	220-240 V	Capacity	3000 ml
Power	150 W	Frequency	36 kHz

## Ultrasonic bath 1.4 L. Ref. 100141

Essential machine in both Dental Lab and Clinic. Real power of 60 W. that guarantees an excellent cleaning power. It has an electronic timer with 7 segments display.

Voltage	230 V 50/60 Hz
Power	60 W
Capacity	1400 ml
Frequency	42 kHz

Voltage 2 batteries AA

Batteries not included

## Distiller / Decalcifier Ref. 100210

Simple and practical appliance. Simply fill the tank with tap water to get 4 litres of distilled water in around 5 hours. Totally automatic and silent operation. The cleaning of the tank is easy and quick. The water produced is very pure (between 2 and 10 mg/ litre of solid residue) and can be used in a large number of applications in the dental clinic and laboratory (autoclaves, creation of compounds, steam generating machines, etc.). The appliance is supplied with a 4-litre PVC tank, a set of activated carbon filters and a can of citric acid to clean the tank. **IMPORTANT-** The water supplied for the appliance is "DISTILLED". However, it cannot be used for syringes, vials, cleaning wounds and generally any surgical application that requires TRI-DISTILLED purity.

Distiller cleaner refill (500 g.) R-100210-01

Spare still filters (6 u.) R-100210-02

Voltage	230 V 50/60 Hz
Power	580 W
Capacity	4 L.

(L) 285 x (W) 285 x (H) 400 mm 5,068 kg

## Tank for distilled water Ref. 080620

A tank specially designed for the storage and supply of distilled water under pressure in the dental sector.

Before filling the tank, it must be properly cleaned and sterilized. Do not use detergents containing hydrochloric acid, hypochlorous acid, etc.

Work pressure: 5 bar  
Conection: Ø 6 mm pipe.

Made of stainless steel.  
With a pressure regulator  
and a **double safety valve.**

### SPECIFICATIONS

Height	680 mm
Width with pressure regulator	255 mm
Diameter	225 mm
Weight	4,7 kg
Capacity	18 litres

## Automatic bag sealer Ref. 080435

Start Date: 20200512 Exp. Date: 20200611 Batch No.: 00000000 Operator: Higienista Department: Seccion esteril Note: Prog. envuelto ID: D119C032

- 7" touch screen with indications.
- Quick heating system for a perfect seal.
- The sealing temperature can be regulated by the user.
- Its integrated printer allows marking the obtained records, for a correct traceability, both in the clinic and in the laboratory.
- In accordance with standards ISO11607-2: 2006 and EN868-5-2009

Sealing speed	10 m/minute
Temperature	60-220°C
Sealing pressure	86 N
Power	500 W
Dimensions	635 x 240 x 200 mm
Weight	17 kg

Optional roller  
Ref. 080436

## Bag sealer Ref. 080433

Simple and nice looking bag sealer. Despite its small size, it has a sealing length of 305 mm and a sealing width of 12 mm. These features are similar to those of sealers of much higher cost. It is ideal for the dental clinic.

Coils not included

Height	210 mm
Width	430 mm

Class I medical device  
(MDR 2017/745) Conforming to  
standards ISO 11607-1:201  
and EN 868-5:2009

Made in Spain

## Tables for 1 and 2 workstations

Very high quality work tables. Assembly is simple. They have all the elements and accessories for work in dental environments: plugs, shelf / shelf, drawers, stainless steel work tablecloth-dolly, air blower, etc. They also come with a pre-installation for a gas burner. They also incorporate a practical chipper that fits perfectly with the **Orión work box (Ref. 080214 from MESTRA)**, forming a compact and fully integrated set.

The dimensions and geometries allow the easy incorporation of other **MESTRA** products (Eolo Aspiration, micromotors, curing lights, etc.), creating an ergonomic and highly productive work environment.

Ref. 100303

## Finishing table

Ref. 100301

Made in Spain

Metal work table with wooden worktop.  
Assembly is simple.  
They have all the elements and accessories for work in dental environments: 2 sockets, shelf, drawer, etc.

 (L) 900 x (W) 600 x (H) 660 mm  46,000 kg

## (Kit) Finishing table

Ref. 100301 K2

- Metal table, wood worktop.
- Chair for workstation.
- Polishing lathe + 2 trays.
- Micromotor.
- LED lamp.

GIFT:

- ★ Magnifying glass.
- ★ Magnet bur holder.

## Chair for workstation

wheels with safety brake  
(EN 1335-2:2009)  
Ref. 100300

 (L) 950 x (W) 610 x (H) 100 mm  63,000 kg

## Work chairs

Work chairs specially designed for the dental laboratory. Comfortable, ergonomic and easy to clean. Allow 1 seat height adjustment. The material used is spongy polyurethane in black.

	Ref. 100297	Ref. 100298
Max. seat height	660 mm	555 mm
Min. seat height	460 mm	420 mm
Seat dept	450 mm	450 mm
Seat widt	460 mm	460 mm
Weight	9 kg	8 kg

## Work chair

Ref. 100299

4 different regulations allowed: seat height and inclination and backrest height and angle of inclination.

Max. height	555 mm
Min height	420 mm
Depth	450 mm
Width	460 mm
Weight	10.3 kg

Wheels with safety brake  
(EN 1335-2:2009)

4 different regulations allowed: seat height and inclination and backrest height and angle of inclination.

Wheels with safety brake  
(EN 1335-2:2009)

Max. seat height	515 mm
Min. seat height	390 mm
Seat depth	420 mm
Seat width	420 mm
Weight	9 kg

(L) 610 x (W) 610 x (H) 325 mm 10.5 kg

## Electric mobile trolley

Ref. 100307

Made of steel sheet and enameled in white.

3 trays of 290 x 396 mm.  
3 sockets to power the equipment.  
4 wheels with smooth and balanced movement.  
Weight supported per tray: 5 kg

(L) 430 x (W) 520 x (H) 860 mm 12 kg

## Electric mobile trolley

Ref. 100305

Made of steel sheet and enameled in white.  
3 trays of 40 x 30 cm.  
2 sockets to power the equipment.  
4 wheels with smooth and balanced movement.

## Electric mobile trolley

Ref. 100306

Made of steel sheet and enameled in white.

3 glass trays.  
2 sockets to power the equipment.  
4 wheels with smooth and balanced movement.

## Electric mobile trolley

Ref. 100309

Electric mobile trolley with wheels for the dental clinic. Made of resin and steel sheet enameled in white.

3 sockets to power the equipment.  
3 drawers.  
1 power sockets.  
White colour.  
Smooth glide.

## Electric mobile trolley

Ref. 100308

Made of steel sheet and enameled in white.  
3 trays of 290 x 396 mm.  
3 sockets.  
1 drawer.  
4 wheels with smooth and balanced movement.  
Weight supported per tray: 5 kg

**LED lamp**  
(articulated arm)  
Ref. 100288

58 cm

- 84 large LEDs.
- Color temperature 6000 - 7000 K
- Power consumption 2 to 21 W
- Touch-adjustable light intensity
- Free of Flicker effect
- With clamp for fastening to the table
- Highly resistant articulated arm

(L) 760 x (W) 285 x (H) 120 mm 2.9 kg

**LED lamp**  
(articulated arm)  
Ref. 100290

50 cm

- 117 small LEDs.
- Color temperature 600 - 6000 K
- Power consumption 6 to 24 W
- Free of Flicker effect
- With clamp for fastening to the table

(L) 680 x (W) 220 x (H) 130 mm 2.6 kg

**LED lamp**  
(articulated arm)  
Ref. 100289

45 cm

- 90 large LEDs
- Color temperature 6000 - 7000 K
- Touch-adjustable light intensity
- With clamp for fastening to the table

(L) 555 x (W) 420 x (H) 75 mm 2,9 kg

**Magnifying glass with LED lamp**  
(3 diopter lens) Ref. 100287  
(5 diopter lens) Ref. 100287-5x

- 90 white LEDs
- 3 - 5 diopter lens
- Ø 120 mm lens
- Clamp to fix it to the table

(L) 540 x (W) 255 x (H) 110 mm 3 kg

(L) 920 x (W) 345 x (H) 120 mm 4,5 kg

## Resin mixer

Ref. 150130

Agitation device of resin bottles. Double movement, rolling and swing, so the mixing action is smooth and highly efficient. The characteristics of the resin are not altered due to an excessively energetic movement. A homogeneously mixed resin is indispensable to get an excellent print job. The machine is silent and has a speed regulator.

Height	103 mm
Width	253 mm
Depth	480 mm
Weight	3.12 kg

## Curing light Sun Beam 3D

Ref. 150120

Height	250 mm
Width	300 mm
Depth	300 mm
Weight	6 kg
Wavelength	LED 400 - 405 nm
Useful dimensions	Ø260 x 140 mm

## Lamp for zirconia drying Ref. 100030

The Mestra zirconium drying lamp is an infrared lamp with thermal radiation. It is used to dry the zirconia structures after immersion in the coloring liquid, to avoid corrosion of the sintering furnace resistances due to the acid contained in the liquid. The drying time of the frameworks depends on the type of framework. For bridges up to 5 elements, a drying time of 45 minutes is recommended. For bridges from 5 elements, 90 minutes. Lamp made of aluminum. It is advisable to keep the lamp 45-53 cm away from the material.

Min. height	560 mm
Max. height	705 mm
Width	350 mm
Depth	380 mm
Weight	1.15 kg
Material	Aluminio
Power supply	220-240 V 50-60 Hz
Power	275 W

Ref. 150100

**MagicEye** is a scanner especially designed for use within the industry dental. Its **powerful and intuitive** software incorporates a modern and extensive set of commands, as well as being fully compatible and integrable with 3D dental design applications, which gives it great versatility.

Method	Contactless scanning
Precision	<10 µm
Speed	6 sec. bite scan 9 sec. lower/upper jaw scan
Weight	5 kg (no power supply and accessories)
Camera resolution	2 x 1,3 MP
Room temperature	10 - 30°C
Power supply	230 V 24 VDC
Output format	STL
Light source	Azul

## ACCESSORIES INCLUDED WITH THE SCANNER

Accessories	Model	Poupose	Accessories	Model	Poupose
Multi-die jig Ref. 150100-01		After filling the hole with plasticine, it can be used for inserting the abutment teeth	General bock jig Ref.150100-07		Used for calibration, scanning model, impression and die
Gum jig Ref. 150100-02		Used for fixing both upper and lower jaw on fixture through rubber band or BluTack	Clamp jig Ref. 150100-08		Used to fixing both upper and lower jaw on fixture through an adjustable clamp.
Articulator jig Ref. 150100-03		Used for model scanning	Articulator plate Ref. 150100-09		For articulator scanning.
Calibration board Ref. 150100-04		For calibrating the scanner	Power source Ref. 150100-10		Power source AC 230 V. DC 24 V.
2 Base jigs Ref. 150100-05		Used for fixing both upper and lower jaw on fixture through rubber band or BluTack	USB key Ref. 150100-11		To enable the use of software.
Impression jig Ref. 150100-06		For impression scanning	Scan spray Ref. 130355		Indispensable to achieve an optimal scan, increasing the resolution in the worst reading areas.

Very fast scan

High accuracy

High resolution scan

## Buying and after-sales experience

Installation

Once the scanner has been received, one of our official distributors will accompany you throughout the installation process of the scanner and its accessories.

After sales

The warranty is 1 year. You can choose from several after-sales service options (Basic, Advanced, and Professional).

For this, we have the collaboration of **ExoDesign Dental** (Company specialized in digital flow and CAD-CAM training).

Training

The final price of the scanner includes a training valued at 300 €, taught by **ExoDesign Dental**. Throughout the start-up process, you will be accompanied by one of our official distributors

### *Spray for* laboratory *scanner* Ref. 130355

Indispensable to achieve an optimal scan, increasing the resolution of the areas with the worst reading in a model. Color and texture have been formulated to be very sharp at the lighting frequencies commonly used by dental scanner projectors. Drying times are extremely fast, which improves productivity. Debris sprayed on unwanted surfaces can be easily cleaned. The package contains 200 ml.

## European Directives

European Directives set "essential requirements" for the safety of persons and goods to protect users and the environment. Our products are affected by four Directives:

- Directive 2014/35/UE, known as the "Low Voltage Directive".
- Directive 2006/42/CE, known as the "Machines Directive".
- Directive 2014/30/UE, known as the "Electromagnetic Compatibility Directive (CEM)".
- Directive 93/42/CE, known as the "Medical Devices Directive".

Our products meet the requirements of the Directives which affect them, and bear the CE mark as proof of compliance. We are at the disposal of our customers to provide any information they may require on this matter.

**The manufacturer reserves the right to modify he products without previous notice**

## Anodizing unit

**Solution of water (600 ml)  
and sodium bicarbonate (20 g)**

### Ref. 100295

This device allows you to process titanium dental elements quickly, easily and economically. The results are comparable to products belonging to a much higher category.

- ✓ Corrosion resistance.
- ✓ Wear resistance.
- ✓ Better adhesion and surface finish.
- ✓ Less release of metal ions.
- ✓ It works with a solution of water and sodium bicarbonate.

### Appearance:

The anodic layer can be colored with different shades, giving the titanium a more attractive appearance than the original taupe.

Dimension 207 x 245 x 160 mm
Weight: 2,73 kg
Voltage: 10-65 V
Power supply: AC220-240 V, 50/60 Hz
Power: 100 W
Anodizing time: 5 seconds

## Aspirations Sirocco

The modular nature of this range of aspiration units, provides solutions for clinic and laboratory, allowing the user to choose unit size, arm type, filtering system, etc.

The S model incorporates two stages of HEPA filtration. (high efficiency particle filter). Besides, an external micro-motor detection system and power adjustment in seven levels are also included.

The M and L models are sturdy aspirations, silent and highly reliable. The M is practical for use under the work table and the L (with a big capacity) for CAD/CAM aspiration systems. They incorporate an external connection to a micromotor and a milling machine that will allow to work synchronously with the unit.

- ✓ Motor de inducción (sin escobillas)
- ✓ Induction motor (brushless).
- ✓ Amazing suction power.
- ✓ Efficient low noise aspiration (55 dB).
- ✓ Easy removal and cleaning of the filters.

### Sirocco S specifications

Height 135 mm • Width 280 mm • Depth 280 mm • Weight 3.1 kg • Power 350 W

### Sirocco M specifications

Height 580 mm • Width 290 mm • Depth 330 mm • Weight 11 kg • Power 800 W

### Sirocco L specifications

Height 800 mm • Width 290 mm • Depth 330 mm • Weight 13 kg • Power 800 W

Sirocco S with clinical working box  
Ref. 080534AC

Sirocco M with flexible tube  
Ref. 080536D1

Sirocco L with flexible tube  
Ref. 080537D

## Sense A7 - Induction

Ref. 100230

- ✓ Brushless motor.
- ✓ Manual or pedal speed control.
- ✓ Displayed speed.
- ✓ Right & Left turning ability.
- ✓ Overload protection function.
- ✓ Fault warning function.

Specifications
Dimension 185 x 175 x 128 mm
Weight: 4,27 kg
Maximum speed: 55000 rpm
Torque: 8.5 N-cm
Power: 240 W
Output voltage: 0-36 V
Handpiece weight: 230 g

## Sense A3 - Brushes

Ref.: 100238 (white)

- ✓ Motor with brushes.
- ✓ Manual or pedal speed control.
- ✓ ON/OFF pedal.
- ✓ Displayed speed.
- ✓ Right & Left turning ability.
- ✓ Overload protection function.
- ✓ Fault warning function.

Specifications
Dimension 147 x 120 x 88 mm
Weight: 1,15 kg
Maximum speed: 35000 rpm
Torque: 3.0 N-cm
Power: 70 W
Voltage: 0-33 V
Handpiece weight: 215 g
Diámetro fresas: Ø2.35 mm

Also available  
in graphite color  
(ref.: 100240)

## Sense A6 - Induction

Ref.: 100232 (white)

- ✓ Brushless motor.
- ✓ Manual or pedal speed control.
- ✓ Automatic speed maintenance function.
- ✓ High/Medium/Low speed.
- ✓ Displayed speed.
- ✓ Right & Left turning ability.
- ✓ Overload protection function.
- ✓ Fault warning function.

Specifications
Dimension 246 x 162 x 102 mm
Weight: 2,47 kg
Maximum speed: 55000 rpm
Torque: 8.0 N-cm
Power: 230 W
Voltage: 0-36 V
Handpiece weight: 240 g

Also available  
in graphite color  
(ref.: 100234)

## Prime 221 - Induction

Ref.: 100236

- ✓ Brushless motor.
- ✓ Manual or pedal speed control.
- ✓ Displayed speed.
- ✓ Right & Left turning ability
- ✓ Overload protection function.
- ✓ Fault warning function.

Specifications
Dimension 191 x 130 x 90 mm
Weight: 2,8 kg
Maximum speed: 50000 rpm
Torque: 5.8 N-cm
Power: 120W
Voltage: 0-36 V
Handpiece weight: 205 g

## TITAN 8 (ref. 100202)

Is the first option.  
Distilled Water is loaded directly into the boiler.

## TITAN AUTOFILL (ref. 100203)

It also has a pump to suck distilled water from an external bottle.

- ✓ Made of stainless steel with high quality components.
- ✓ Digital pressure switch.
- ✓ Full and lack of water indicator.
- ✓ Connection cable with built-in differential switch.
- ✓ Drain tap with safety lock.

Specifications 100202 and 100203
Height 36 cm
Width 27 cm
Depth 42 cm
Power 2200 W
Voltage 220 V, 50/60 Hz
Presión 8 bar
Weigth 12,5 kg
Boiler 3 L

**Professional use**

### Additional Information: 100202, 100203, 100204

They are supplied with the following accessories:

- ✓ Power cord with built-in protection.
- ✓ Fine and long replacement nozzle.
- ✓ Replacement safety cap and 2 gaskets.
- ✓ Funnel and measuring cup (300 ml).

In models with direct connection to the water intake:

- ✓ Necessary hoses for water inlet/outlet connection.

Ref. 100202	Ref. 100203	Ref. 100204
✓ Manual filling.	✓ Manual filling.	✓ Manual filling.
	✓ Autofill without previous cooling (external bottle).	✓ Autofill without previous cooling (integrated tank).
		✓ Direct water net connection.

## TITAN PLUS (ref. 100204)

Also has an internal tank for distilled water storage. You can load water into this extra tank without having to turn off the machine and wait for the pressure inside the boiler drops. Simply open the auxiliary tank cap and pour more water when you need it.

Safer and without interruptions.

Specifications 100204
Height 38 cm
Width 37 cm
Depth 45 cm
Power 2600 W
Voltage 220 V, 50/60 Hz
Presión 4 - 8 bar
Weigth 18 kg
Boiler 3 L
Auxiliary tank 2 L
